The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

- 3. Our Company is reliant on the demand from the steel industry for a significant portion of our revenue. Any downturn in the steel industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company’s business and results of operations.***

Our products used as a raw material in the steel industries. Our revenues are highly dependent on our customers from the steel industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. Further, in the event, there takes place a shift of practice of developing raw materials in-house in the steel industries or the other industries which we cater to, it may have an adverse impact on the demand for our products. Similarly, in the event of any new breakthrough in the development of a novel product or raw material by our competitors or customers, our products may become obsolete or be substituted by such alternatives; thereby impacting our revenues and profitability adversely. It may also happen that our competitors are able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer their similar or high quality products at lower price our Company may be unable to adequately react to such developments which may affect our revenues and profitability.

- 4. There have been instances of incorrect filings of certain forms with the RoC, in the past.***

Our Company had inadvertently failed to file consolidated accounts after consolidating the accounts of the Associate Companies and its *erstwhile* wholly owned subsidiary, QVC Steels Private Limited from the Financial Years 2014-15 to 2020-21. Our Company has made an application before the National Company Law Tribunal, Kolkata, under Section 131 of the Companies Act, 2013 read with Rule 11 of the National Company Law Tribunal Rules, 2016 for seeking condonation of delay in filing the consolidated financial statements from the Financial Years 2014-15 to 2020-21 and for re-filing of the financial statements along with Form AOC-4 for the said financial years. The said application is presently pending for approval.

While, no show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same, however we anticipate the following estimated penalties to be imposed upon us:

Particulars	Year	Penalty or Fine
AOC-4 XBRL CFS	2014-15	22,690.00
	2015-16	226,900.00
	2016-17	226,900.00
	2017-18	207,600.00
	2018-19	171,100.00
	2019-20	134,500.00
	2020-21	98,000.00
Total		1,087,690.00

It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

5. *We depend on a few customers for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.*

Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

6. *The prices we are able to obtain for our products that we trade depend largely on prevailing market prices.*

The price of the products traded by us has a significant impact on our profits. Some of our core products have been subject to price fluctuations resulting from government policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

7. *The commercial success of our services depends to a large extent on the success of the success of the end use customers. If there is any downturn in the industries in which the customers operate, it could have a material adverse effect on our business, financial condition and results of operations.*

Our Company is engaged in the business of dealing in various types of ferro alloys and other raw materials for the steel industry. The success of our business operations is dependent upon the success of the business of our customers who are manufacturers engaged in the steel industry. Therefore, the commercial success of our business is highly dependent on the commercial viability and success of our customers. Any downturn in the industries in which our customers operate or the demand of the products or services of our customers and end use customers, could have a direct impact on the demand of our services and our business operations. Any disturbance in the industry in which our customers operate could adversely impact our business due to our high dependence on our customers. Alternatively, in the event our customers are able to devise an in-house procurement unit, or if our customers are able to find a cheaper alternative for our services, it may conversely result in a reduction in the demand of our services and have a material adverse effect on our business, financial condition and results of operations.

8. *The business orders which we undertake may be delayed, modified, cancelled, or not fully paid for by our clients and therefore, could materially affect our business, results of operations and financial condition.*

The business orders which we undertake may be cancelled or may be subject to changes in scope or schedule. We may also encounter problems executing the orders or executing them on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone an order or cause its cancellation. Such factors could include delays or failures to obtain necessary permits, right-of-way, or receive performance bonds and other types of difficulties or obstructions. Any delay, failure, or execution difficulty with respect to orders in our Order Book could materially affect our business, results of operations and financial condition.

9. *We are dependent upon few suppliers for the material requirements of our trading business.*

Our Company is engaged in the business of dealing in various types of ferro alloys and other raw materials for the steel industry. We majorly import the products traded by us from foreign jurisdictions. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Our Company maintains a list of approved and quality suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of products could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our ability to execute orders. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the excipient industry in general. We cannot assure you that we will always be able to meet our material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of materials to our customers. Further, we also cannot assure you with a reasonable certainty that the materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers. Any inability on our part to procure sufficient quantities of materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

10. *We derive majority of our revenue from our export operations. Any adverse events affecting these countries could have an adverse impact on our results from operations.*

During Fiscal 2022 to Fiscal 2024, majority of our revenue was earned through export operations. The export destination countries impose varying duties on our products. There can be no assurance that the duties imposed by such countries will not increase. Further, an economic slowdown in countries to which we export our products may have a significant adverse impact on our business, financial condition, cash flows and results of operations. India is also a party to, and is currently negotiating, free trade agreements with several countries and if we export our products to such countries, any revocation or alteration of those bilateral agreements may also adversely affect our ability to export, and consequently, our business, financial condition, cash flows and results of operations. Additionally, export destination countries may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements and alteration of existing tax treaties may lead to increased competition or may even place us at a competitive disadvantage compared to manufacturers in other countries and could adversely affect our business, financial condition, cash flows and results of operations. Further, our inability to secure any license, certification, registrations and permits that may become necessary in other jurisdictions to which we export our products, in a timely manner or at all, could result in operational delays or suspensions and/or administrative fines and penalties, which could have a material adverse effect on the overall business, results of operations, cash flows and financial condition.

11. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products & services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 199 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

12. *The proposed objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our financials.*

The objects of the Offer for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Offer, as specified in the section titled “*Objects of the Offer*” are based on the company’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our financials.

13. *We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

14. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-

compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "Government and Other Approvals" beginning on page 223 of this Prospectus.

- 15. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.**

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

- 16. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.**

We have experienced negative cash flows in the past which have been set out below:

Particulars	March 31, 2024	March 31, 2023	March 31, 2022
Net cash flow used in operating activities	1,002.12	274.10	194.46
Net cash flow used in investing activities	(378.91)	(353.81)	138.64
Net cash flow used in financing activities	(758.51)	144.47	(178.71)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer "Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 164 and 199, respectively.

- 17. We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize**

The details of our contingent liabilities are as follows:

		(₹ in lakhs)

If any of these contingent liabilities materialize, our results of operations and financial condition may be adversely affected. For further details of our contingent liabilities, see the chapter titled "Financial Statements" beginning on page 164 of this Prospectus. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

- 18. We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.**

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness we do not obtain any independent support from credit information companies or credit bureaus and on independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

19. All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitabilities as we scale our operations.

Our purchase and sales models includes various intermediaries who may connect with our competitors and share details of the specialties of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

20. We have in past entered into related party transactions and we may continue to do so in the future.

As of March 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 164.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

21. There are outstanding litigations involving our Company, our Promoters, Directors and Group Companies which, if determined adversely, may affect our business and financial condition.

As on the date of this Prospectus, our Company, our Promoters, Directors and Group Companies are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, our Promoters, Directors and Group Companies or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

22. *Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain unsecured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.*

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain unsecured borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled “*Objects of the Issue*” on page 71 of this Prospectus. While we believe that utilization of Net Proceeds for repayment of unsecured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

23. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process transactions and banking data into well managed accounts systems. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate a growing customer base or product portfolio or supplier base. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

24. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

25. *Any adverse change in regulations governing our products, may adversely impact our business prospects and results of operations.*

An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

26. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

27. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of the end product before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Further, one of the objects of this Offer includes funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see "*Objects of the Offer*" on page 71. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

28. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to

compete effectively which may result in higher costs and would adversely affect our business and results of operations.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

29. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the ferro alloys industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

30. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

Our Company is currently using logo , which is not yet registered in the name of our Company. While, we have made applications for registering the name and logo of our Company, however the application is pending for approval. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled “*Our Business*” and “*Government and other Statutory Approvals*” on pages 101 and 223, respectively of this Prospectus.

31. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 143, 156, 209 and 164, respectively of this Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

32. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Offer, our Promoters and members of our Promoter Group will collectively hold 73.22% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

33. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Offer Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 58 of this Prospectus.

34. *We are exposed to foreign currency exchange rate fluctuations, which may impact our results of operations and cause our results to fluctuate. Our inability to manage our foreign currency risk may harm our results of operations and cause our results to fluctuate and/or decline.*

Our financial statements are presented in Indian Rupees. However, our revenue and expenses are influenced by the currency of foreign countries. As on March 31, 2024, 83.46% of our revenue from operations was earned from our export operations. Further, as of January 31, 2024, we export our products to various countries, including but not limited to Taiwan, Japan, Bangladesh, Vietnam, Thailand, Turkey, Aganistan, Korea, Italy, Ukrain, United Kingdome, Belgium, Oman, etc. We import manganese ore, manganese ore lumps from reputed miners and manufactures in Hong Kong and France. Further, due to the time gap between the accounting of purchases and actual payments, the foreign exchange rate at which the purchase is recorded in the books of accounts may vary with the foreign exchange rate at which the payment is made, thereby benefiting or affecting us, depending on the appreciation or depreciation of Rupee as compared to the foreign currency. We may, therefore, be exposed to risks arising from exchange rate fluctuations, suffer losses on account of foreign currency fluctuations for our material procurement and/or payments received and we may not be able to pass on all losses on account of foreign currency fluctuations to our customers. As on date of this Prospectus, we do not have any hedging policy to mitigate the losses on account of foreign currency fluctuations. There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our inability may harm our results of operations and cause our results to fluctuate and/or decline.

35. *Our future fund requirements, in the form of further Offer of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further Offer of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

36. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 209 of this Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

37. *Our Group Company is engaged in a similar line of business as our Company and may compete with us.*

Our Group Company, QVC International Private Limited is engaged in the same business as our Company, and may have common pursuits with our Company. We cannot assure you that there will be no conflict of interest in allocating business opportunities between us and our Group Company going forward. While, there is currently no active conflict between our Group Company and our Company, however we cannot assure you that there will not be any conflict of interest in allocating business opportunities between us and our Group Company going forward. We have not entered into any non-compete agreement with our Group Company, and there can be no assurance

that our Group Company will not compete with our existing business or that we will be able to suitably resolve any such conflict without an adverse effect on our business and financial performance.

- 38. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.***

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 209 of this Prospectus.

- 39. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further, we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Offer*” beginning on page 71 of this Prospectus.

- 40. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 138 of this Prospectus.

- 41. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.***

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain car insurance policies for insuring vehicles owned by us, marine sales turnover insurance policy, burglary insurance policy, general insurances for insuring properties owned by us and group personal accident policy for

insuring our employees. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

42. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 163 of this Prospectus.

43. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

44. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the Industry and related data contained in this Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

45. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the

effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

46. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for purchasing plant and machinery, primarily, as detailed in the chapter titled "Objects of the Offer" beginning on page 71 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

47. *The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Offer Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

48. *There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

49. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Offer. Our Company, in consultation with the lead manager, will determine the Offer Price. The Offer Price may be higher than the trading price of our Equity Shares following this Offer. As a result, investors may not be able to sell their Equity Shares at or above the Offer Price or at the time that they would like to sell. The trading price of the Equity Shares after the Offer may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

50. *The price of the Equity Shares may be highly volatile after the Offer.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Offer as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse

media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

51. Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

Our Company intends to use the Net Proceeds towards funding of working capital requirements and repayment of unsecured borrowings. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as per applicable laws, as disclosed in the section titled "*Objects of the Offer*" on page 72.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

52. You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Offer.

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Offer or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Offer will be listed on the Stock Exchanges in a timely manner or at all.

53. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward

movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

54. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Offer.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

55. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

56. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

57. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

58. *Our Company will not receive any proceeds from the Offer for Sale portion.*

The Offer comprises an Offer for Sale aggregating up to ₹ 7,48,800 lakhs. Our Company will not receive any proceeds of the Offer for Sale portion. EXTERNAL RISK FACTORS

59. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

60. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

61. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

62. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

63. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

64. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

65. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

66. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Utilisation of Net Proceeds

The Net Proceeds are proposed to be utilised in the manner set forth below:

Particulars	Amount
Repayment of Unsecured Loans	109.00
Funding of working capital requirements of our Company	900.00

(₹ in lakh)

The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds of the Offer.

The requirement and deployment of funds as indicated above are based on our current business plan, internal management estimates, prevailing market conditions and other commercial and technical factors, including interest rates and other charges, and the financing and other agreements entered into by our Company, and have not been appraised by any bank or financial institution. Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations and configuration of the project, increase in input costs of construction materials and labour costs, logistics and transport costs incremental preoperative expenses, taxes and duties, interest and finance charges, engineering procurement and construction costs, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned

expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management, subject to compliance with applicable law.

Moreover, if the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Offer in accordance with Regulation 230(2) of the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated amount of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals, general corporate purposes and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Offer. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

For further details of factors that may affect these estimates, see "Risk Factors" on page 28

Means of Finance

We propose to fund the requirements of the Objects detailed above entirely from the Net Proceeds. Accordingly, we confirm that there is no requirement to make firm arrangements of finance to be made through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Offer and existing identifiable internal accruals as required under Regulation 230(1)(e) the SEBI ICDR Regulations.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below prepandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with prepandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below prepandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to prepandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed prepandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers' income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of prepandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with prepandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

OVERVIEW OF THE INDIAN ECONOMY

India continues to show resilience against the backdrop of a challenging global environment, according to World Bank's latest India Development Update (IDU). The IDU, the Bank's flagship half yearly report on the Indian economy, observes that despite significant global challenges, India was one of the fastest-growing major economies in FY22/23 at 7.2%. India's growth rate was the second highest among G20 countries and almost twice the average for emerging market economies. This resilience was underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector. Bank credit growth increased to 15.8% in the first quarter of FY23/24 compared with 13.3% in the first quarter of FY22/23.

The World Bank forecasts India's GDP growth for FY23/24 to be at 6.3%. The expected moderation is mainly due to challenging external conditions and waning pent-up demand. However, service sector activity is expected to remain strong with growth of 7.4% and investment growth is also projected to remain robust at 8.9%.

"Tapping public spending that crowds in more private investments will create more favourable conditions for India to seize global opportunities in the future and thus achieve higher growth." - Auguste Tano Kouame, World Bank's Country Director in India.

"While the spike in headline inflation may temporarily constrain consumption, we project a moderation. Overall conditions will remain conducive for private investment," said Dhruv Sharma, Senior Economist, World Bank, and lead author of the report. "The volume of foreign direct investment is also likely to grow in India as rebalancing of the global value chain continues."

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

— Real GDP growth (Annual percent change) 6.1
 — Inflation rate, average consumer prices (Annual percent change) 5.1

India’s nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India’s current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second-highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL FERRO ALLOYS OVERVIEW

Ferroalloys Market size was valued at USD 132.19 billion in 2021 and is poised to grow from USD 139.5 billion in 2022 to USD 204.2 billion by 2030, growing at a CAGR of 5.6% in the forecast period (2023-2030). Ferroalloys (and master alloys in general) were created to enhance the qualities of steels and alloys by adding certain alloying elements in the most practical, technically, and economically advantageous manner. In order to incorporate chemical ingredients into molten metal, ferroalloys, or alloys comprising iron and one or more alloying elements, are used. No grade of steel is made without ferroalloys.

The use of metallic addition agents to add an alloying element to molten steel or refine steel, in which ferroalloys play a significant part, is being considered by the industrial sector. Several international organizations provide poor nations money so they may use ferroalloys more frequently. Governments in several nations are focusing on the usage of ferroalloys as a result of the growth in environmental concerns. For example, a ferroalloy used in the foundry and steel

mill industries was manufactured by Elkem Métal Canada Inc., which received a CAD 5 million funding announcement from the federal government. The Government of Quebec contributes an additional CAD 11.95 million to accomplish this. The money will go toward the production of biocarbon briquettes, a sustainable substitute for metallurgical coal that can lessen foundries' and steelworks' negative environmental effects. In order to potentially cut 100,000 tonnes of CO2 equivalent per year for Elkem Métal Canada, the company plans to replace the 43,000 tonnes of metallurgical coal used at its Chicoutimi facility in Quebec with 37,000 tonnes of bio-briquette (biocarbon).

Ferroalloys offer greater tensile strength and endurance. As a result, stakeholders in the automotive and transportation industries are more drawn to ferroalloy products. To resurrect market growth following the COVID-19 epidemic, businesses are developing balanced relationships with their suppliers and ecosystem partners.

Global Ferroalloys Market Segmental Analysis

Global ferroalloys market is segmented based on the Product, End User, and region. Based on the product type the global ferroalloys market is segmented into ferrochrome, ferromanganese, ferro silicomanganese, and ferrosilicon. Based on application the global ferroalloys market is segmented into carbon & low alloy steel, stainless steel, alloy steel, cast iron, and others. Based on Region it is categorized into North America, Europe, Asia-Pacific, Latin America, and MEA.

Ferroalloys Market Analysis by Product Type

The ferromanganese sector held the largest share of more than 20.0 percent in the global ferroalloys market in 2021. The steelmaking and foundry industries are the main industries that use ferromanganese. Due to its employment as a desulphurizing agent in the production of steel and other materials, ferromanganese demand is primarily driven by its sulfide and deoxidant former characteristics. Iron sulfide, which may cause cracking, cannot develop when manganese

and sulfur interact. Furthermore, it is the most popular ferroalloy and contains between 70 and 80 weight percent manganese and between 6 and 8 weight percent carbon. Most FeMn is marketed in its high carbon form, which ranges in carbon content from 2 to 7.5 percent. The manufacturing of flat carbon steel goods often uses it. The Mn recovery is impacted by factors including time, charge basicity, and temperature during the high carbon synthesis. The extent of the carbothermal reduction processes often rises with an increase in these parameters, which enhances the Mn recovery from charge.

From 2022 to 2028, the ferrosilicon market is anticipated to grow at a CAGR of 8.1% in terms of value. Metals are reduced from their oxides using this technique, such as when deoxidizing steel. Additionally, it offers resistance to corrosion and raises the standard and durability of items made of iron and steel. Stainless steel, alloy steel, carbon steel, electrical steel, and cast irons are all made from ferrosilicon.

Ferroalloys Market Analysis by Application

With a market share of more than 34.0 percent in 2021, the stainless-steel sector led the industry. Over the projection period, the category is anticipated to see a profitable CAGR. International Stainless Steel Forum statistics issued on March 14 show that the global output of stainless steel increased 10.6% from the previous year to 56.3 million mt in 2021. In 2021, China produced 30.6 million mt, or 54.4 percent of the world's output, up 1.6 percent a year. Double-digit year-over-year growth was also observed in the US, up 10.4% to 2.4 million mt, and Europe, up 13.6% to 7.2 million mt. A 42 percent boost in output was also seen in the "others" category, which includes Brazil, Russia, South Africa, South Korea, and Indonesia.

Over the course of the projection, cast iron is expected to continue to grow at the quickest rate in the industry. A minor amount of manganese, chromium, nickel, tungsten, and molybdenum are included in cast iron, a ferrous alloy. The category is expected to increase as a result of benefits such as the cheap cost of component manufacture, superior casting characteristics, better compression strength, durability, and resistance to deformation.

Global Ferroalloys Market Regional Insights

In terms of both volume and revenue, the Asia Pacific region led the market in 2021, accounting for over 61 percent of worldwide revenue. As a major producer and consumer of ferroalloys, China is expected to continue to dominate the market in the years to come. India, Indonesia, Malaysia, and Vietnam are the newly developing regional markets for ferroalloys in the Asia Pacific area. In the years to come, significant development is anticipated in China and the aforementioned emerging markets. China imported 43.44 mnt of ferrosilicon in calendar year 21, an increase of 89 percent year over year from 22.96 mnt in calendar year 20. North Korea was the leading exporter with 37.09 mnt (up 141%), followed by South Africa with 0.31 mnt and Norway with 4.49 mint (down 13% each) (21 percent). Lower domestic output of ferrosilicon and increased imports of ferrosilicon last year were mostly caused by the rigorous limitations imposed by China's dual control policy. Power consumption restrictions increased energy prices, and production restrictions for crude steel all continued to have an influence on domestic output. According to figures compiled by SteelMint, China's total imports of chrome ore were at 14.95 mnt in January through December of this year, a modest 4 percent increase from 1.32 mnt the year before.

Because so much steel is produced in the U.S. compared to Canada and Mexico, the market for ferroalloys in this country is substantially greater. A crucial element driving the market expansion for ferroalloys is the rising domestic steel manufacture in the area. The demand for ferroalloys in the region fell precipitously in 2020 as steel output fell by more than 17 percent. Leading market players like Volkswagen, Ford, and BMW announced the temporary closure

of their production facilities amid the spread of COVID-19 in 2020; however, production resumed in the second half of that year. As a result, the well-established automotive sector in Germany has seen sluggish growth. In 2020, Volkswagen will temporarily close its factories in Slovakia, Germany, Italy, Spain, and Portugal.

Global Ferroalloys Market Dynamics

Ferroalloys Market Driver

Due to an increase in global steel output, the global ferroalloys market is predicted to expand. Ferrochrome, ferrosilicon, ferromanganese, and ferromolybdenum are only a few examples of the ferroalloys. Different ferroalloy varieties are used for various steel-making processes. For instance, ferrovandium is used in the production of steel to provide the material resistance to alkalis and acids like sulfuric and hydrochloric acid. It gives casting and welding electrodes corrosion resistance and increases their tensile strength.

Due to the growing demand for high-performance materials that can operate at extremely high operating temperatures in the combustion chamber, ferroalloys are essential in the production of superalloys, which are high-performance alloys used in extreme environments where corrosion and heat resistance are paramount.

For uses in the manufacture of heat exchangers, industrial gas turbines, submarines, the aerospace industry, and chemical processing, superalloys have taken the place of conventional steel. For the production of next-generation aircraft, the ferroalloys market prognosis predicts an increase in demand for materials with high mechanical strength, surface stability, and thermal protection. Superalloy makers have a lot of potential because to these advances. Stakeholders profit from such continuous trends in the ferroalloys industry.

Ferroalloys Market Restraint

The growth of the ferroalloys market is expected to be constrained by the replacement of stainless steel with carbon fibers. Due to its small weight, high strength, and load-bearing capabilities, carbon fibers are extensively employed in the automobile sector. A car's weight is reduced by roughly 30% thanks to carbon fibers. Carbon fiber is becoming the most sought-after material due to the growing significance of lightweight cars. The production process' automation also makes carbon fibers more attractive than stainless steel in the long run.

Ferroalloys Market Recent Developments

In July 2022, with the goal of collaborating on researching low carbon iron and steelmaking technologies, Tata Steel and BHP, a major global resources firm, signed a Memorandum of Understanding (MoU). By working together in two major areas – the use of biomass as an energy source and the implementation of carbon capture and utilization (CCU) in steel production - Tata Steel and BHP want to minimize the emission intensity of the blast furnace steel route. The alliance intends to promote both businesses' efforts to combat climate change and India's aspirations to become carbon neutral by 2070.

In July 2022, one million tonnes per year Neelachal Ispat Nigam Limited ('NINL') was purchased by Tata Steel Long Products Limited, a subsidiary of Tata Steel, from MMTC Ltd., NMDC Ltd., MECON Ltd., Bharat Heavy Electricals Ltd., Industrial Promotion and Investment Corporation of Odisha Ltd., Odisha Mining Corporation Ltd., President of India, and Government of Odisha for 93.71 percent. Global Ferroalloys Key Market Trends

The greatest end-use market for steel goods is construction, where rebars, sections, channels, and angles are often employed. The global construction industry is anticipated to expand considerably between 2022 and 2030. The need for ferroalloys, one of the main feedstocks used to produce steel, is anticipated to increase as a result, which will help the demand for steel products.

Global crude steel output is increasing rapidly.

As the main centers of steel demand, rising countries like China and India own large stakes in this. There are some significant automakers operating in these nations, supplying the rising local consumer demand. The population is growing, and the level of life is rising, which helps the building industry. Recent steps taken by governments in the Asia Pacific area to strengthen the industrial sector may potentially significantly increase demand for ferroalloys during the anticipated time period.

INDIAN FERRO ALLOYS INDUSTRY

Ferro-alloys are one of the important inputs in the manufacture of alloys and special steel. They impart special properties to steel. The alloys provide increased resistance to corrosion, improves hardness and tensile strength at high temperature, gives wear and abrasion resistance and increases creep strength, etc. The growth of Ferro-alloys Industry is, thus, linked with the development of the Iron and Steel Industry, Foundry Industry and to some extent Electrode Industry. The principal ferroalloys are chromium, manganese and silicon. The product series consists mainly of ferromanganese, silico-manganese, ferro-silicon and ferro-chrome.

Ferro-alloys are classified into two main categories, viz, bulk ferro-alloys and noble ferroalloys. Owing to high cost of power, Ferro-alloys Industry has not been operating to its full capacity in India. The Electricity cost accounts over 40 % to 70 % of total cost of production, depending on the Ferro Alloys produced.

At present, major portion of the ferro-alloys produced is exported. Ferro-manganese, silicomanganese, ferro-silicon, high carbon ferro-chrome and charge-chrome are exported after meeting the domestic requirements. India has sufficient highly skilled technical manpower and the latest equipment technology for production of ferro-alloys.

India ranks 1st in the world for the export of Sillico Manganese & ranks 4th in the world for export of Ferro Manganese

The Industry structure (By capacity) represents as follows:

Capacity	Million Tonnes (MT)
Manganese Alloys	3.16
Chromium Alloys	1.69
Ferro Silicon	0.25
Noble Alloys	0.05
TOTAL	5.15

Ferro-manganese/Silico-manganese

Ferro-manganese is produced as high carbon ferro-manganese with 72-82% Mn, 6-8% C and 1.5% Si, medium carbon ferro-manganese with 74-82% Mn, 1-3% C and 1.5% Si and low carbon ferromanganese with 80-85% Mn, 0.1-0.7% C and 1-2% Si. Manganese in the form of ferro-manganese is added for hardening and desulphurisation of steel.

Silico-manganese, a combination of 60-70% manganese, 16-28% silicon and 1.5 to 2.5% carbon is used as a more effective deoxidizing agent than high carbon ferromanganese in the production of various types of steels. It is also used as feedstock to produce refined alloys like medium and low carbon ferromanganese. It consumes around 4,750

to 5,250 kWh power per tonne of silico-manganese produced. Silico-manganese has emerged as a more important alloy than ferro-manganese. The country, thus, has emerged as a leading producer of silico-manganese. Silico-manganese was also produced by a number of small-scale ferro-alloy producers. The total production of ferromanganese in 2017-18 was about 5,18,000 tonnes which remained same in 2018-19. The estimated consumption of ferromanganese was 50,800 tonnes in 2017-18. The production of silicomanganese (including medium-carbon & lowcarbon silicomanganese) which was about 3,11,326 tonnes in 2017-18 increased to 3,45,291 tonnes in 2018-19. In 2017-18, the total consumption of silicomanganese by all industries has been estimated at 1,22,600 tonnes.

Ferrochrome/Chargechrome

Ferrochrome when added to steel imparts hardness, strength and augments its stainless characteristics. For every tonnes of stainless steel (depending on the grade), there is 17-23% of chrome content is required. Hence, if the stainlesssteel Industry grows, the ferrochrome Industry also grows. Carbon content classifies the ferrochrome alloy into high-carbon (6-8%), medium-carbon (3-4%) and low-carbon (1.5-3%), although chromium content in all the three grades is around 60-70%. Around 2.5 tonnes chrome ore with an estimated power consumption of 4,500 kWh is required to produce one tonne of ferrochrome. Ferrochrome is produced by electric carbothermic reduction of chromite

The total production of ferrochrome/charge chrome in 2017-18 was about 9,44,000 tonnes which remained same in 2018-19. The consumption of ferrochrome was estimated at 14,600 tonnes in 2017-18.

Ferrosilicon

Ferrosilicon contains about 75-90% silicon and minor amounts of iron, carbon, etc. It is produced by using quartzite, iron ore, coke and electrode paste. Around 1.75 to 2 tonnes quartzite is required to produce one tonne of ferrosilicon. A very high consumption of power, i.e., 9,000 to 10,000 kWh is required to produce one tonne of ferrosilicon. It is a powerful deoxidising agent and its major applications are in electrical steel used for transformers and dynamos, alloy steel for tools & automobile valves and in iron casting and mineral dressing. Ferrosilicon is used by the military to quickly produce hydrogen for balloons. For this, chemical reaction of sodium hydroxide, ferrosilicon and water is utilised.

NOBLE FERROALLOYS

Noble ferroalloys are one of the vital additive inputs required especially in production of alloy and special steel. Noble ferroalloys also refer to alloys used in small quantities and are relatively expensive compared to bulk ferroalloys. These are used in the production of steel as deoxidant and alloying agents. These high temperature alloys impart strength, resistance and stability within a temperature range from 260 to 1,200° C. These alloys are used generally in turbine engines, power plants, furnaces and all pollution control equipment. Noble ferroalloys include ferrovanadium, ferrotitanium, ferronickel, ferromolybdenum, ferrotungsten and ferroniobium. In India, noble ferro-alloys are mostly manufactured through alumino-thermic process.

Ferronickel

The consumption and production of ferronickel were not reported in the Organised Sector.

Ferromolybdenum

There were five important Units, namely, Mehra Ferroalloys, Electro Ferroalloys Pvt. Ltd, India Thermit Corporation, Bharat Pulverising Mills Ltd and Sunbel Alloys Co. of India Ltd. The all India production decreased considerably by 17% to 1,003 tonnes in 2018-19 as compared 1,205 tonnes in 2017-18.

Ferrotungsten

The consumption and production of ferrotungsten in 2018-19 were not reported in the Organised Sector. Ferrovanadium Production of ferrovanadium in 2017-18 was 1,331 tonnes which decreased considerably by 24% to 1,013 tonnes in 2018-19.

Manganese Ore

Manganese ore is silvery in colour and very hard and brittle in nature. It is always available in combination with iron, laterite and other minerals. Manganese in Alloy form is an essential input in steel making and is one of the most important metals in an industrial economy. Manganese of major commercial importance are: Pyrolusite (MnO – Mn about 63.2%) (ii) psilomelane (manganese oxide) containing water and varying amounts of oxides of Ba, K and Na as impurities; Mn commonly 45-60%) (iii) manganite (Mn₂O₃·H₂O, Mn about 62.4%) and (v) braunite (3Mn₂O₃·MnSiO₃ – Mn about 62% and SiO₂ about 10%)

Indian manganese ore deposits occur mainly as metamorphosed bedded sedimentary deposits associated with Gondite Series (Archaean) of Madhya Pradesh, (Balghat, Chhindwara & Jhabua districts), Maharashtra (Bhandara & Nagpur districts), Gujarat (Panchmahal district), Odisha (Sundargarh district) and with Kodurite Series (Archaean) of Odisha (Ganjam and Koraput districts) and Andhra Pradesh (Srikakulam and Vishakapatnam districts)

Resources

The total reserves/resources of manganese ore in the country as on 1.04.2015 has been placed at 495.87 million tonnes as per NMI database, based on UNFC system. Out of these, 93.47 million tonnes are categorised as Reserves and the balance 402.40 million tonnes are in the Remaining Resources category. Gradewise, Ferromanganese grade accounts for 7%, Medium grade 11%, BF grade 28% and the remaining 54% are of Mixed, Low, Others, Unclassified, and Not-known grades including 0.17 million tonnes of Battery/Chemical grade. Statewise, Odisha tops the total reserves/resources with 44% share followed by Karnataka 22%, Madhya Pradesh 12%, Maharashtra & Goa 7% each, Andhra Pradesh 4% and Jharkhand 2%. Rajasthan, Gujarat, Telangana and West Bengal together shared the remaining 2% resources.

Uses & Specifications

Classification of manganese ore, ferruginous manganese ore, siliceous manganese ore, dioxide manganese ore and manganiferous iron ore is laid down by BIS vide specifications no. IS:11895-2006 (Reaffirmed 2008) Manganese ore is an important material in iron and steel metallurgy, where it is used both in the ore form as such and as Ferro manganese. Manganese improves strength, toughness, hardness and workability of steel, acts as a deoxidizer and desulphuriser and also helps in getting ingots free from blowholes. About 90 to 95% world production of manganese ore is used in metallurgy of iron and steel. Manganese has no satisfactory substitute in its major applications. The specifications of manganese ore by different industries are detailed below:

In iron & steel industry specification is laid down for manganese ore (BIS:11281-2005) However, specification based on the user industry indicate that normally manganese ore containing 28 to 35%Mn is used. Ore size generally varies from 10 to 40mm.

For manganese ore used in Ferro manganese industry, besides manganese content other important considerations are high manganese to iron ratio and a very low content of deleterious phosphorus. Specifications of manganese ore for Ferro manganese are prescribed by BIS (IS:4763-2006) BIS has also laid down specification of manganese ore sinters for blending for Ferro manganese production (IS:12596-1989)

Consumption

The consumption of manganese ore in all industries was about 2.06 million tonnes in 2018-19 as against 2.70 million tonnes in 2017-18. Ferroalloys industries accounted for about 89% consumption followed by Iron & Steel (10%). The remaining (1%) was shared by Battery, Electrode, Chemical, Zinc Smelter and Alloy Steel industries (Table- 9). The consumption of ferromanganese in 2018-19 decreased by 36% to 51 thousand tonnes from 79 thousand tonnes in the previous year. Iron & steel Industry was the bulk consumer of ferromanganese accounting for about 87% consumption

in 2018-19. The remaining 13% was consumed in alloy steel, foundry and electrode industries. Consumption of silicomanganese which was 161 thousand tonnes in 2017-18 decreased to 123 thousand tonnes in 2018-19

Industry

Manganese alloys are the largest produced ferroalloys in the world with a share of about 41% of the global production of ferroalloys. For production of one tonne of ferro manganese, about 2.6 tonnes of manganese ore, 0.5 tonne of reductant and 3 MWh of electricity inputs are required. As per Indian Ferro Alloys Producers' Association (IFAPA), the total installed capacity of manganese alloys including ferromanganese/silicomanganese in the country was estimated to be around 3.16 million tonnes per annum

Ferro Manganese

The total production of various types of manganese alloys (high-carbon ferromanganese, medium-carbon ferromanganese and low-carbon ferromanganese) was about 5.18 lakh tonnes in 2018-19

Silico Manganese

Silico Manganese is combination of 60-70% Mn, 10-20% silica and about 20% carbon. As per Monthly Statistics of Mineral Production (March, 2019- Final Release), production of silico-manganese was reported at 3,45,291 tonnes in 2018-19 as compared to 3,11,326 tonnes in 2017-18. The major factor driving the production of manganese alloys is high production growth of low nickel austenitic stainless steel. India is emerging as the largest producer of this steel where manganese is added substituting the expensive nickel.

Imports:

Imports of ferroalloys (total) decreased marginally by 7% to 5,08,008 tonnes in 2018-19 from 5,44,264 tonnes in the previous year. In terms of value, the ferroalloys import increased to ₹ 7,573 crore in 2018-19 from ₹ 6,617 crore in 2017-18. Out of total imports in terms of quantity, imports of ferrosilicon accounted for about 44% followed by ferromanganese (24%), ferronickel (17%), ferrochrome (6%) and chargechrome (4%). Other ferroalloys together accounted for the remaining 5% of the imports in 2018-19. Imports were mainly from Bhutan (21%) followed by Malaysia (17%), China (14%), Indonesia & South Africa (9% each), Japan (4%) Korea Republic of, Russia & Singapore (3% each) and Brazil (2%) (Tables-27 to 44).

FUTURE OUTLOOK

Depending on the process of steel making and the type of steel being manufactured, the requirement of different ferroalloys varies widely. Indian Ferroalloys Industry has immense potential and capability to compete in the international market. On the positive side, India produces some of the finest ferroalloys in the world. Indian ferroalloys are extensively preferred in Europe. India exports potential is indeed bright with very high growth prospects. As per the steelworld report, ferroalloys Industry is estimated to grow at a CAGR of 5.9% between 2017 to 2025 and is expected to reach a valuation of US\$ 188.7 Bn by 2025. India is expected to show strong growth in usage of steel in the coming years because of its robust economy, massive infrastructure needs and expansion of industrial production. India is expected to become one of the leading steel consuming nations in the next decade. In this scenario, the Ferroalloys Industry estimates that the consumption of ferroalloys will increase domestically and internationally in the coming years. Some of the Ferroalloy Producers have already gone for expansion and some new units are coming up. As per the National Steel Policy, 2017, Ferroalloy is a power intensive industry. Hence, captive power generation in the ferroalloys plants will be extensively supported. Since the demand for ferroalloys is likely to grow along with steel production in the country, the Industry would have to be encouraged to set up larger units to achieve adequate economies of scale. Efforts in the direction of providing necessary raw materials linkages and stable supply of power to the Ferroalloy units must be rendered priority.

OUR PRODUCTS

Details of the products sold and marketed by us have been provided below:

Product	Detail
<p>Manganese Ore:</p> 	<p>Manganese (Mn) is essential to iron and steel production by virtue of its sulfur- fixing, deoxidizing, and alloying properties. Steel making, including its iron making component, accounts for most domestic manganese demand, presently in the range of 85% to 90% of the total. Manganese ferroalloys, consisting of various grades of ferro manganese and silico manganese, are used to provide most of this key ingredient to steel making. Products for construction, machinery, and transportation are leading end uses of manganese. Manganese also is a key component of certain widely used aluminum alloys and, in oxide form, dry cell batteries.</p>
<p>Ferro Manganese</p> 	<p>Ferro Manganese is primarily an alloy of manganese and iron. It contains a high content of manganese and used in steel products wherein silicon content needs to be controlled at low levels. It is mainly used in the silico manganese production of flat steel, manganese-rich steel and stainless- steel products.</p> <p>Configuration: Low P, Low Ti.</p> <p><i>Key Features:</i></p>

Product	Detail
	<p>Impeccable chemical composition Free from impurities Corrosion proof Fine anti-oxidant characteristics Low melting point Sturdiness</p>
<p>Silicon Manganese</p> 	<p>Silicon Manganese is an alloy of manganese, silicon and iron. It is a cost-effective blend of manganese and silicon and is normally the product of choice for steel manufacturers. It is consumed in all steel products and used in higher quantities in 200 series stainless steel, alloy steel and manganese steel.</p> <p>Configuration: Low carbon, Low Boron, Low Ti, Low P, High Mn.</p> <p><i>Key Features:</i></p> <p>Precise content of manganese & silicon Sturdiness High strength Excellent chemical properties Deoxidizer Purity</p>
<p>Ferro Chrome</p> 	<p>Ferro Chrome is an alloy of chromium & iron containing 50 – 70% chromium by weight. Addition of chromium improves the strength and yield point of steel and reduces elongation insignificantly. The presence of Chromium in carbon steels improves their hardness and wear resistance. Ferro Chrome is made from a mixture of Chromite Ore & Iron in an electric arc furnace. Ferro Chrome is majorly produced in South Africa, China, Kazakhstan, Russia and India. Most of the Low Carbon Ferro Chrome is used in the production of Stainless steel.</p> <p>The additions of Ferro Chrome in low alloy steels contribute towards a range of improved properties, especially to achieve a balance of through-section hardness and toughness in Engineering Steels such as bearing, tool, high strength/low alloy and high speed steels, pumps, valves, pipes, rolls and wear plates.</p>
<p>Ferro Silicon</p> 	<p>Ferro Silicon is an alloy of silicon and iron. Silicon acts as a strong steel oxidant. Used primarily in special steels and in small quantities in mild steel. Ferro silicon is also used for manufacture of silicon, corrosion-resistant and high-temperature resistant ferrous silicon alloys, and silicon steel for electromotors and transformer cores.</p> <p>Configuration: Low Al</p> <p><i>Key Features:</i></p> <p>Precise composition High purity Rigidity</p>

Use of Estimates:

The preparation of the financial statements in conformity with GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amount of revenues and expense during the reporting period. Accounting estimates could change from one period to another. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods as and when the Management becomes aware of the changes in circumstances surrounding the estimates. Changes in estimates are reflected in the period in which the changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Operating Cycle

Based on the nature of products/activities of the company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non current.

Current and Non-Current Assets:

All assets and liabilities are classified into current and non-current.

Assets:

An asset is classified as current when it satisfies any of the following criteria:

- a) It is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle;
- b) It is held primarily for the purpose of being traded;
- c) It is expected to be realized within 12 months after the reporting date; or
- d) It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at-least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities:

A liability is classified as current when it satisfies any of the following criteria:

- a) It is expected to be settled in the Company's normal operating cycle;
- b) It is held primarily for the purpose of being traded;
- c) It is due to be settled within 12 months after the reporting date; or

Property, Plant and Equipment:

Property, plant and equipment are carried at cost of acquisition or construction net of recoverable taxes, trade discounts and rebates less accumulated depreciation and/or accumulated impairment loss, if any. The cost of an item of property, plant and equipment comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price. Subsequent expenditures related to an item of property, plant and equipment (except land) are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. The valuation and recognition is done by keeping in view the provisions of the Accounting Standard 10 on "Accounting for Property, Plant and Equipment". None of Fixed Assets have been revalued during the Year.

Depreciation on Tangible Fixed Assets has been provided on Written down Value Method over the useful lives of Assets as prescribed in Schedule II of the Companies Act, 2013. Depreciation for Assets purchased/sold during a period is proportionately charged.

Property, plant and equipment is eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposal.

Losses arising from retirement or gains or losses arising from disposal of property, plant and equipment which are carried at cost are recognized in the Statement of Profit and Loss.

Property, Plant and Equipment - Intangible:

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and any accumulated impairment loss.

Intangible assets are amortized in the Statement of profit and loss over their estimated useful lives, from the date that they are available for use based on the expected pattern of consumption of economic benefits of the asset.

In accordance with the applicable Accounting Standard, the Company follows a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. However, if there is persuasive evidence that the useful life of an intangible asset is longer than ten years, it is amortized over the best estimate of its useful life. Such intangible assets that are not yet available for use are tested annually for impairment.

Intangible assets comprise ERP software only, which are being amortized over a period of 5 years.

Amortization method and useful lives are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use and disposal.

Inventories:

Inventories comprise Trading Goods and are carried at the lower of cost and net realizable value. Cost of inventories comprises all costs of purchase and other costs incurred in bringing the inventories to their present location and condition. Valuation of inventories is done on a First in First Out (FIFO) basis.

Employee Benefits:

On initial recognition, all investments are measured at cost. The cost comprises of purchase price and directly acquisition charges such as brokerage, fees and duties.

Long –term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments. On disposal of investments, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit & loss.

Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future income will be available except that deferred tax assets, in case there are unabsorbed depreciation or losses, are recognized if there is virtual certainty that sufficient future taxable income will be available to realize the same.

Provisions, Contingent Liabilities and Contingent Assets

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote.
