SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 129, 90 and 173 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 23 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 173 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

INTERNAL RISK FACTORS

1. **We depend on a limited number of customers for our revenue from operations, the loss of any of these customers individually or severally could have a material adverse effect on our business, operations and could have impacted our financial strength.**

We derive a significant portion of our revenue from our top 10 customers. As of December 31, 2023, our top 10 customers contributes 86.81% of revenue from operations. Further, the share of our top 10 customers for the Fiscal year 2023, 2022 and 2021 was approximately 85.91%, 89.65% and 91.41%. The loss of all or a substantial portion of sales to any of our top 10 customers, in particular for any reason (including, due to loss of contracts or failure to negotiate acceptable terms, loss of market share of these customers, disputes with these customers, adverse change in the financial condition of these customers, decline in their sales, plant shutdowns, labour strikes or other work stoppages affecting production of these customers), could have an adverse impact on our business, operations and could have impacted our financial strength.

Further, the volume and timing of sales to our top 10 customers may vary due to variation in demand for such customers' products or on account of their manufacturing and growth strategy. Thus, any decrease in the demand for our products from these customers, or a termination of our arrangements altogether, would adversely impact our results of operations, financial condition and cash flow. These customers may also change their material sourcing strategy by replacing us with our competitors, or replace their existing products with alternative products which we do not supply. Also, these customers may demand price reductions and there is no assurance that we will be able to offset any reduction of prices to these customers with reductions in our costs or by acquiring new customers.

- 2. We do not have agreements/commitment on part of our customers to purchase or place orders with us, also we do not have any price agreement with our customers. If our customers select some other vendors/competitors for their requirement, it may have adverse effect on our business.**

As per our business strategy, we are required to submit a technical proposal that includes product features, performance specifications, compliance with legal and regulatory requirements, proposed development timeline etc. Once these are approved we may also be required to develop and supply concept prototypes for the customer based on initial design plans. Once our prototype is confirmed to have met the customer's specifications and clears the testing phase, we receive firm orders from the customers. Pursuant to the purchase order, our customers provide us the quantities of units to be supplied along with the delivery schedules specifying the details of delivery. In many cases, these purchase orders set forth the terms of sales but do not bind these customers to any specific products, specifications, purchase volumes or duration and can be terminated by these customers with or without cause and without compensation. Under the purchase orders, there is no commitment on the part of the customer to purchase the quantities specified in the volume purchase orders or to place new orders with us and as a result, our sales from period to period may fluctuate as a result of changes in our customers' supplier preference. Further, since our arrangement with our customers is not exclusive, it entitles the customers to replace us with another supplier. Any reduction in the quantities ordered or shifting of our customers towards our competitors may have an adverse effect on our business operations and financial position.

- 3. We depend on a few suppliers for the supply of steel, our primary raw material. Further, we do not have definitive supply agreements with our suppliers for the supply of steel. If our suppliers fails to fulfil our requirement, it may have adverse effect on our business.**

We are engaged in manufacturing forging and machining components which requires steel as our primary raw material. Further, we are required to undertake the manufacturing activities in strict compliance with the regulatory standards and specifications of the customers. High quality steel required for manufacturing of the forging and machining components as per our requirements is supplied by selected suppliers in the Indian market that force us to rely on a few suppliers to supply steel for our operations. Our top 10 suppliers as of December 31, 2023 contributes 85.97% of our purchases. Further, the share of our top 10 suppliers for the Fiscal year 2023, 2022 and 2021 was approximately 91.19%, 94.14% and 91.06%. We do not enter into definite-term agreements with our suppliers (who typically supply us through purchase orders) and they may not perform their obligations in a timely manner or at all, resulting in delays to our production schedule and adversely affecting our output. We cannot assure that no such instance will not arise in the future where delay in supply of steel would not have an adverse impact on our results of operations, cash flows, financial condition or business. Also, we are exposed to risk of upward fluctuations in the prices of our raw materials and their availability. Since, we have not entered into any supply agreements with our suppliers and all raw materials are bought by our Company from various suppliers on order-to-order basis, any upward fluctuation in the prices of the major raw material or shortage in supply of our major raw material would result in increase of cost of production which may adversely impact the business and profitability of the Company. In case we are not able to pass on any such increase to the consumers because of competition or otherwise, it may affect the profitability of the Company.

Our reliance on a select group of suppliers may also constrain our ability to negotiate our arrangements, which may have an impact on our ability to procure an uninterrupted supply of steel, which in turn may affect our profit margins and financial performance. We may also be required to replace a supplier if its products or services do not meet our safety, quality or performance standards. In case we replace the suppliers, they may not perform their obligations in a timely manner or at all, resulting in delays to our production schedule and adversely affecting our output or may demand early payments which may affect our working capital cycle and financial position.

- 4. We have taken loans and any inability to comply with repayment and other covenants can adversely affect our business, reputation and financial condition.**

We have entered into financing arrangements with our lenders for short-term and long terms facilities for purposes including funding our working capital requirements and purchasing capital goods. As of December 31, 2023, our total outstanding borrowings from bank and financial institutions amounted to ₹ 2686.64 lakhs. Our ability to pay interest and repay the principal for our loans is dependent upon our ability to generate sufficient cash flows to service such debt. Failure to meet conditions related to the loan could have significant consequences on our business and operations. Further, these loans creates a sense of financial burden on the working of the business, financial health and future borrowing capacity of the company. Additionally, under our

loan agreements, we are required to comply with certain covenants, if there is a default under such loan agreements, our company may be required to prepay the amount due or may be penalized by the lenders. In case of any default under the loan agreements the lenders may refuse to renew the financial arrangements, which may require us to find alternate source of funds which may not be available or if available may be on strict terms, which may have an adverse effect on our business operations and financial conditions.

5. Our business is dependent on the performance of certain other industries which we are serving particularly automobile, tractors, railways, farm equipment etc. Any adverse changes in the conditions affecting these industries can adversely impact our business and financial condition.

We indirectly serve different customers in different industries including but not limited to particularly automobile, tractors, railways, farm equipment, any adverse impact in the industry may affect the demand for our products in those specific industry and effect our revenue from operations. Below is a break-up of our revenue from operations from different industry segments we cater to –

(Amt in Rs. Lakhs)

Customers	Stub period Dec 2023		Fiscal 2023		Fiscal 2022		Fiscal 2021	
	Revenue from Customers	% of Revenue	Revenue from Customers	% of Revenue	Revenue from Customers	% of Revenue	Revenue from Customers	% of Revenue
Commercial Vehicles	6,982.05	51.89%	8,884.82	50.30%	4,546.03	34.21%	2,495.57	22.79%
Farm Equipments	1,466.87	10.90%	1,445.44	8.18%	1,457.63	10.97%	1,605.16	14.66%
Industrial	1,203.81	8.95%	1,590.54	9.00%	1,309.26	9.85%	885.37	8.08%
off Highway Vehicles	3,803.50	28.27%	5,744.05	32.52%	5,974.94	44.97%	5,965.88	54.47%

Further, production and sales of the vehicles for which we supply products are affected by a variety of other factors that are beyond our control, including changes in government policies, changes in consumer demand, product mix shifts favoring other types of vehicles, fuel prices, vehicle electrification, economic conditions, demographic trends, employment and income levels and interest rates, disruptions in these industries' supply chain, vehicle age, labour relations, regulatory requirements, credit availability and cost of credit and general economic and industry conditions. Any such unforeseen event or any negative impact in the industries we are catering could have adverse impact on our business and financial strength.

6. Our production process require uninterrupted power and fuel supply and any disruption/shortage of power or fuel sources could affect our product quality or increase our production costs and adversely affect our business, and operations.

We require substantial power and fuel for our manufacturing facilities. The following tables set forth below our power and fuel expenses (net) in the years/ periods indicated:

Nature of Exp	Stub period Dec 2023		Fiscal 2023		Fiscal 2022		Fiscal 2021	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
Electricity Exp	501.45	3.73%	568.84	3.22%	526.31	3.96%	457.35	4.18%
Fuel Exp	807.28	6.00%	1121.92	6.35%	801.03	6.03%	595.80	5.44%

We will continue to purchase electricity for our operations from the state electricity board of Punjab. In case the cost of electricity from state electricity boards is revised upward significantly and we are not able to pass on such increase to our customers, our cost of production and profitability will be adversely affected. Any disruption / non-availability of power or fuel or failure on our part to arrange alternate sources of electricity, in a timely manner and at an acceptable cost shall directly affect our production which in turn shall have an impact on operations and results of our Company

7. We have substantial working capital requirements and may require additional capital and financing in the future and our operations could be curtailed if we are unable to obtain the required additional capital and financing when needed.

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. As part of our business process, significant amounts of working capital are required to finance the purchase or manufacturing of materials, providing credit to the customers before payment is received from clients and maintaining stock of inventory. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of orders received. Our capital expenditure requirements and growth strategy thus require continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence and laws that are conducive to our raising capital in this manner.

8. *Our company has been recently formed by conversion of the erstwhile Partnership firm into the company, thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.*

Our Company was incorporated as a limited Company under the Companies Act, 2013 with Registrar of Companies, Chandigarh dated April 25, 2023. The company has been incorporated by conversion of the erstwhile Partnership firm, thus we have limited operating history as a company from which one can evaluate our business, future prospects and viability. Our future business operation and financial position may not be comparable with that of the partnership firm and difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may remain volatile. Although, our overall presence in the forging and machining business is of over a decade, as the partnership firm has been converted into the public limited company on a going concern basis but, there can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits post conversion of the partnership firm to company. Any inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. For further details, see the chapter titled “History and Corporate Structure” and “Restated Financial Statements” on page 110 and 129 respectively of the Draft Red Herring Prospectus.

9. *Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.*

Our Company’s business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the period December 31, 2023, fiscal year 2022-23, FY 2021-22 and FY 2020-21 our inventories were ₹ 3568.19 lakhs, ₹ 2119.26 lakhs, ₹ 1079.33 lakhs and ₹ 1361.42 lakhs. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. Moreover, since most of our sales are based on orders received from customers as per their requirements, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and/ or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the period December 31, 2023, fiscal year 2022-23, FY 2021-22 and FY 2020-21 our trade receivable were ₹ 2184.63 lakhs, ₹ 3190.20 lakhs, ₹ 2082.65 lakhs and ₹ 1649.64 lakhs. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

10. *Failure to obtain or maintain pre-qualifications from customers or loss of our pre-qualified status from our existing customers could adversely impact our business.*

Majority of our customers require forging manufacturers to undergo certain pre-qualification processes. These processes evaluate both the technical ability to provide relevant products with the exact specifications needed by the end-user, and the production capabilities of the supplier. These processes may generally take time to complete and involves incurring significant upfront expenses in learning and meeting customer qualification requirements. Further, we may also be required to provide our customer with the prototype of the product with the exact specifications as per their requirements, which undergo extensive testing and approvals from the customer before any purchase orders being placed. We continuously strive to retain our prequalification status as approved suppliers, with the existing customers. Our failure to obtain pre-qualifications from newer customers or loss of our prequalified status from our existing customers could have an adverse impact on our profits, results of operations and cash flows.

11. *If we fail to compete effectively with our competitors it may impact adversely our business, financial positions and result of operations.*

Our company is engaged into the business of forging and machining of components which are used in automobile and certain other industries, which is highly competitive. The industry is highly fragmented as there is competition from various domestic and international players. We face competition from both organized and unorganized players in the industry. The competition in the industry is based on factors such as design, range of products, quality, technology, delivery time, price and engineering capabilities. In such highly competitive environment, to gain more market share our competitors may reduce prices which is a challenge for the existing players. Intensified competition may result in pricing pressures and reduced profitability and may impede our ability to achieve sustainable growth in our revenues or cause us to lose market share. Some of our competitors may have certain advantages, like greater financial, technical and/ or marketing resources, which can enhance their ability to finance acquisitions, fund international growth, more quickly respond to technological changes and/ or operate in more diversified geographies and product portfolios. Further, if our competitors develop and implement methodologies that yield greater efficiency

and productivity, they may be able to offer services and solutions similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and customer needs, our competitors may be more successful at selling their products and solutions. Any of these events could substantially harm our results of operations. We cannot assure you that we will be able to compete with them successfully, which could have a material adverse effect on our business operations and financial conditions.

12. We are subject to strict design, quality and delivery requirements and any failure to comply with these design, quality and delivery standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects.

We develop and manufacture complex and specialized components which caters to various sectors based on specific requirements stipulated by our customers. Given the nature of our products and the sector in which we operate, we believe that our customers have high standards for product quality, design standards and delivery schedules. Adherence to design & quality standards is a critical factor as any defect in products manufactured by our Company or failure to comply with the specifications of our customers may, in turn, lead to the manufacture of faulty end-products. Component failures, manufacturing non-conformance, efficacy concerns or design defects with respect to our products, if they were to occur, could result in directly or indirectly, personal injuries or other adverse effects. This may lead to cancellation of supply orders and at certain instances may impose additional costs in the form of product liability and/or product recall. Though, our manufacturing facility have been certified with ISO 9001:2015 for quality management systems, EMS 14001:2015 for environmental management systems, ISO 45001:2018 for occupational health and safety management systems, IATF 16949:2016 for doing business with OEMs manufacturing Components in Automotive Industry & ZED GOLD by Government of India for sustainability with Zero Effect and Zero Defect. Further, we maintain strict quality control at different levels of operations but any negative publicity regarding our Company or our products could adversely affect our reputation, our operations and our results from operations

13. We derive certain portion of our revenues from exports and are subject to risk of international trade.

We have historically derived certain portion of our revenues from operations from export to countries like: France, Germany, Poland, Brazil, Austria, Turkey and United States of America. During the nine months period December 31, 2023, Fiscal 2023, Fiscal 2022 and Fiscal 2024, our revenues from our exports amounted to ₹ 574.37 lakhs, ₹ 850.07 lakhs, ₹ 431.19 lakhs and ₹ 288.30 lakhs respectively, which constituted 4.27%, 4.81%, 3.24% and 2.63% respectively, of our total revenues from operations. Therefore, any developments in the global market or the industries in which our customers operate or specifically in the geographies where we operate could have an impact on our sales from exports. If any severity persists or war like situations occurs between countries across the globe in future our revenue from export may be affected. Further, tariffs, quotas and other tariff and non-tariff trade barriers may be imposed on our products in jurisdictions in which we operate or seek to sell our products. There can be no assurance that the countries where we export, among others, where we seek to sell our products will not impose trade restrictions on us in future. We may also be prohibited from exporting to certain restricted countries that may be added to a sanctions list maintained by the Government of India or other foreign governments. Any such imposition of trade barriers may have an adverse effect on our results of operations and financial condition. In addition, our revenues from these markets may decline as a result of increased competition, regulatory action, pricing pressures including as a result of anti-dumping measures, fluctuations in the demand for or supply of our products or services, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations could adversely affect our business, prospects, results of operations and financial position.

14. Our business relies heavily on our manufacturing facility, and this dependence will continue. Our manufacturing process involves certain risks. Any slowdown or shutdown in operations, including strikes, work stoppages, or increased wage demands by employees, could disrupt our operations. Such disruptions could negatively impact our business, financial condition, and operational results.

We operate through our manufacturing facility located near Indian Oil Jabir Petrol Pump, Kohara-Machhiwara Road, Mangarh in Ludhiana, Punjab. Our manufacturing facility is dedicated to forging and machining operations. Efficient management of this facility is crucial to our business, yet our operations are exposed to a range of risks, many of which are beyond our control. These risks include equipment breakdowns, industrial accidents, severe weather conditions, and natural disasters. Any significant malfunction or failure of our machinery, plant, or IT systems could result in substantial repair and maintenance costs and operational delays. If we are unable to repair our assets and systems promptly, we may need to suspend operations until replacements are procured. Additionally, we may conduct planned shutdowns for maintenance, customer audits, testing, or for capacity expansions and equipment upgrades.

Furthermore, manufacturing disruptions may arise if we violate any conditions of our regulatory approvals, potentially requiring us to cease or limit production until the issues are resolved. Although we have not faced significant disruptions at our manufacturing facilities in the past, we cannot assure that such disruptions will not occur in the future. Our inability to effectively address and rectify these disruptions promptly and cost-effectively could lead to a slowdown or shutdown of our operations, or under-utilization of our facility, adversely affecting our business, financial condition, and results of operations.

15. We are dependent on third party transportation providers for the delivery of our raw materials, components and finished products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them may have an adverse effect on our business, financial condition, results of operations and prospects

We use third party transportation providers for the delivery of our raw material, components and finished products. Transportation strikes if happen could have an adverse effect on overall industry and accordingly may affect-our receipt of raw materials and components and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an additional cost escalation. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects. Further, any disruption into the movement of goods from one place to another could affect our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers and could lead to additional cost. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition. We are subject to the risk of increases in freight costs. If we cannot fully offset any increases in freight costs, through increases in the prices for our products, we would experience lower margins, which in turn may adversely affect our business, financial condition and results of operations.

16. We require many approvals, licenses, permits for running our business. Any failure for obtaining/renewal or retain such licenses in timely manner may adversely affect our operations/business.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further we require to keep already obtained valid key approvals such as Tax Registrations, Factory and environment related approvals and Labour related approvals, for running our operations in a smooth manner. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

However, we thoroughly review our business operations and identify all the regulatory approvals, licenses, and permits required at the central, state, and local levels, including manufacturing licenses, environmental clearances, trade licenses, registrations under applicable laws, etc. Secondly, we proactively engage with the relevant regulatory authorities to understand the application procedures, documentation requirements, and timelines, which will help identify and resolve any bottlenecks in the approval process. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" at pages 101 and 186 respectively of this Draft Prospectus.

17. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our Company has obtained insurance coverage in respect of certain risks which consists of Burglary Insurance Policy, Machinery Breakdown Insurance Policy, Fire Insurance Policy, Electronic Equipment Insurance Policy, Commercial General Liability Policy, Comprehensive Product Liability and Recall Insurance and other Vehicle Insurance etc. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected. There are possible losses, which we may not have insured against or covered or wherein the insurance cover in relation to the same may not be adequate. We may face losses in the absence of insurance and even in cases in which any such loss may be insured, we may not be able to recover the entire claim from insurance companies.

If any uncertainty arises including losses arising on account of third-party claims or if a claim made by us in respect of an insurance is not accepted or any loss occurred by us is in excess of the insurance coverage, the same may adversely affect our operation, results and financials. If our arrangements for insurance or indemnification are not adequate to cover claims, we may be required to make substantial payments and our results of operations and financial condition may be affected.

We are considering conducting a comprehensive review of your current policies, implementing robust risk management practices, increasing insurance limits for high-risk areas, exploring alternative risk transfer mechanisms, regularly updating coverage to

address evolving risks, developing business continuity plans, and investing in loss prevention and safety programs. By combining these strategies, we can enhance our protection against operational risks, reduce reliance on insurance as the sole risk mitigation tool, and ensure our business remains resilient in the face of potential hazards. For further information, see the chapter titled “Our Business” on page 90 of this Draft Prospectus.

18. We are exposed to foreign currency fluctuation risks, which may affect our results of operations.

Our business involves export transactions with foreign companies, which are received in US Dollars or other foreign currencies. Any adverse fluctuation in the price of Indian Rupee against these foreign currencies would adversely affect the export value of our products. During the nine months period December 31, 2023, fiscal year 2022-23, fiscal year 2021-22 & fiscal year 2020-21 the exports accounted for approximately ₹ 574.37 lakhs, ₹ 850.07 lakhs, ₹ 431.19 lakhs and ₹ 288.30 lakhs respectively, which constituted 4.27%, 4.81%, 3.24% and 2.63% respectively. The exchange rate between the Rupee and these foreign currencies has fluctuated substantially in recent years and may continue to fluctuate significantly in the future. The foreign exchange gain during the nine months period December 31, 2023, fiscal year 2022-23, fiscal year 2021-22 & fiscal year 2020-21 accounted for approximately ₹ 15.85 lakhs, ₹ 18.10 lakhs, ₹ 4.37 lakhs & ₹ 5.46 lakhs respectively. 19. Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospects and future financial performance. Moreover, information relating to capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Our capacity utilization may be affected by many factors including but not limited to the availability of raw materials, industry and market conditions, the product requirements of, and the procurement practice followed by, our customers. For the nine months period December 31, 2023, FY 2022-23, FY 2021-22 and FY 2020-21 our capacity utilization of manufacturing facility at Ludhiana, Punjab was 78.21%, 71.84%, 60.26% and 66.99% for the forging activities and 81.51%, 78.16%, 78.22% and 73.14% for the machining section respectively. In the event that we are unable to achieve full capacity utilization of our current manufacturing facilities, this would result in operational inefficiencies which may have an adverse effect on our business, financial condition, cash flows, future prospects and future financial performance. For further details in relation to our capacity utilization, see “Our Business” on page 90 of the Draft Red Herring Prospectus. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could adversely impact our business, growth prospects and future financial performance. In case of oversupply in the industry or lack of demand, we may not be able to utilize our capacity efficiently. Further, information relating to capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facilities. Undue reliance should therefore not be placed on our capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled “Our Business” on page 90 of this Draft Red Herring Prospectus.

Our business operations are subject to hazards such as risk of equipment failure, work accidents, fire or explosion and require individuals to work under potentially dangerous circumstances or with flammable materials. Although we employ safety procedures in the operation of our facilities and maintain what we believe to be adequate insurance, there is a risk that an accident or death may occur at our manufacturing facility. An accident may result in destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facility were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

Further, in case the trademark application is opposed, we may be required to defend the same and any adverse outcome of these opposition proceedings may hinder our ability to use these logos in part or at all in the future. This in turn could affect our reputation, business, results of operations and prospects. Further, the defence of intellectual property suits and related legal and administrative proceedings can be both costly and time-consuming and may significantly divert the efforts and resources of our technical and management personnel. We may not achieve a favourable outcome in any such litigation. While we have not experienced any instances of infringement of intellectual property or related litigation in the past, but there is no assurance that such instances will not occur in the future and if any claim is adversely determined against us in any of such potential litigation or proceedings, we could be subject to significant liability to third parties. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. We intend to use the Net Proceeds of the Fresh Issue for the purposes described in “Objects of the Issue” on page 64. The objects of the Issue and deployment of funds have not been appraised by any external agency or any bank or financial institution or any other independent agency. The proposed utilization of Net Proceeds is based on our current business plan, management estimates, prevailing market conditions and other commercial considerations, which are subject to change and may not be within the control of our management. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our business plans and may have an adverse impact on our business, financial condition, results of operations and cash flows. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

Although we do not engage these laborers directly, we may be held responsible for any wage payments to be made to such laborers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, there are certain conditions under the Contract Labour (Regulation and Abolition) Act, 1970, as amended, which we are required to adhere to and in the event of any non-compliance by contractors with statutory requirements, legal proceedings may be initiated against us. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

41. Our company has encountered challenges in meeting the designated timelines for filing statutory returns, which may subject us to penalty under the relevant laws.

There have been delays in filing GST, EPF and ESIC returns by our Company. After conducting an internal review, we have identified that the primary reasons for these delays are related to reconciliation and operational issues. Delays in the submission of these returns may result in financial penalties and potential legal consequences, which may affect our operations. Furthermore,

delayed provident fund and ESIC returns can adversely affect our relationship with regulatory authorities, potentially leading to increased scrutiny and further financial repercussions. To address this issue, we have implemented corrective measures to mitigate future delays. These measures include - Enhancing our reconciliation process to minimize discrepancies, implementing improved cash flow forecasting and management practices, strengthening communication and coordination within our team to expedite return filing.

In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. 44. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 64 of this Draft Red Herring Prospectus.

45. Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will have an additional liability. For instance, our company in the past had delayed filing of certain returns due to operational reasons and accordingly paid late fees and penalties on the same. Any demand or penalty raised by the

concerned department or authorities for such late filing may affect the financial position of the company.

46. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows and working capital requirements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 128 of the Draft Red Herring Prospectus.

47. The average cost of acquisition of Equity Shares by our Promoters may be lower than the Issue price of the Equity Share in the proposed IPO.

The average cost of acquisition of Equity Shares of our Promoters may be lower than the Issue price of the Equity Share in the proposed IPO. For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares of our Promoters in our Company, please see section titled “*Capital Structure*” beginning on page 54 of this Draft Red Herring Prospectus.

48. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold collectively [●] % of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

49. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

50. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy. Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

51. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “**Basis for Issue Price**” beginning on page 71 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue in case of unfavourable situation it, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

52. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders’ decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders’ ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

53. *Certain key performance indicators for certain listed industry peers included in this Draft Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.*

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “Basis for Issue Price” beginning on page 71 of the Draft Red Herring Prospectus. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

EXTERNAL RISK FACTORS

54. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Any financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India.

55. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be

transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

56. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

57. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “**Government and Other Approvals**” on page 186 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

58. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Famine, War, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, famine, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Our operations may be adversely affected by natural disasters and/or severe weather conditions, which can result in damage to our seeds inventory and hamper our productivity and may slow down our business operations temporarily or any other factor, which can adversely affect agriculture market in which we operate. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

In addition, India has witnessed local civil disturbances in past, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

59. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

60. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

61. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

62. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in any part of the world or other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

63. Changing regulations in India could lead to new compliance requirements that are uncertain.

The regulatory environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the forging industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

64. Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

GLOBAL ECONOMY OVERVIEW

Economic activity was surprisingly resilient through the global disinflation of 2022–23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. Growth in employment and incomes held steady, reflecting supportive demand developments—including greater-than-expected government spending and household consumption—and a supply-side expansion amid, notably, an unanticipated boost to labor force participation. The unexpected economic resilience, despite significant central bank interest rate hikes aimed at restoring price stability, also reflects the ability of households in major advanced economies to draw on substantial savings accumulated during the pandemic. In addition, as Chapter 2 explains, changes in mortgage and housing markets over the prepandemic decade of low interest rates moderated the near-term impact of policy rate hikes. As inflation converges toward target levels and central banks pivot toward policy easing in many economies, a tightening of fiscal policies aimed at curbing high government debt, with higher taxes and lower government spending, is expected to weigh on growth.

Global growth, estimated at 3.2 percent in 2023, is projected to continue at the same pace in 2024 and 2025. The forecast for 2024 is revised up by 0.1 percentage point from the January 2024 World Economic Outlook (WEO) Update, and by 0.3 percentage

point from the October 2023 WEO. The pace of expansion is low by historical standards, owing to both near-term factors, such as still-high borrowing costs and withdrawal of fiscal support, and longer-term effects from the COVID-19 pandemic and Russia's invasion of Ukraine; weak growth in productivity; and increasing geoeconomic fragmentation. Global headline inflation is expected to fall from an annual average of 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. The latest forecast for global growth five years from now—at 3.1 percent—is at its lowest in decades. The pace of convergence toward higher living standards for middle- and lower-income countries has slowed, implying a persistence in global economic disparities. As Chapter 3 explains, the relatively weak medium-term outlook reflects lower growth in GDP per person stemming, notably, from persistent structural frictions preventing capital and labor from moving to productive firms. Chapter 4 indicates how dimmer prospects for growth in China and other large emerging market economies, given their increasing share of the global economy, will weigh on the prospects of trading partners.

Risks to the global outlook are now broadly balanced. On the downside, new price spikes stemming from geopolitical tensions, including those from the war in Ukraine and the conflict in Gaza and Israel, could, along with persistent core inflation where labor markets are still tight, raise interest rate expectations and reduce asset prices. A divergence in disinflation speeds among major economies could also cause currency movements that put financial sectors under pressure. High interest rates could have greater cooling effects than envisaged as fixed-rate mortgages reset and households contend with high debt, causing financial stress. In China, without a comprehensive response to the troubled property sector, growth could falter, hurting trading partners. Amid high government debt in many economies, a disruptive turn to tax hikes and spending cuts could weaken activity, erode confidence, and sap support for reform and spending to reduce risks from climate change. Geoeconomic fragmentation could intensify, with higher barriers to the flow of goods, capital, and people implying a supply-side slowdown. On the upside, looser fiscal policy than necessary and assumed in projections could raise economic activity in the short term, although risking more costly policy adjustment later on. Inflation could fall faster than expected amid further gains in labor force participation, allowing central banks to bring easing plans forward. Artificial intelligence and stronger structural reforms than anticipated could spur productivity

As the global economy approaches a soft landing, the near-term priority for central banks is to ensure that inflation touches down smoothly, by neither easing policies prematurely nor delaying too long and causing target undershoots. At the same time, as central banks take a less restrictive stance, a renewed focus on implementing medium-term fiscal consolidation to rebuild room for budgetary maneuver and priority investments, and to ensure debt sustainability, is in order. Cross-country differences call for tailored policy responses. Intensifying supply-enhancing reforms would facilitate inflation and debt reduction, allow economies to increase growth toward the higher prepandemic era average, and accelerate convergence toward higher income levels. Multilateral cooperation is needed to limit the costs and risks of geoeconomic fragmentation and climate change, speed the transition to green energy, and facilitate debt restructuring.

Indian Economy overview

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was Rs. 71.66 trillion (US\$ 861.2 billion), as against

Rs. 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of January 19, 2024, India's foreign exchange reserves stood at US\$ 616.14 billion.
- In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
- Merchandise exports in December 2023 stood at US\$ 38.45 billion, with total merchandise exports of US\$ 505.15 billion during the period of April-December (2023-24).
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- At the beginning of January 2024, the PMI Services comfortably remained in the expansionary zone, registering a value of 61.2.
- In December 2023, the gross Goods and Services Tax (GST) revenue collection stood at Rs.1,64,882 crore (US\$ 19.80 billion), of which CGST is Rs. 30,443 crore (US\$ 3.65 billion), SGST is Rs. 37,935 crore (US\$ 4.55 billion).
- Between April 2000–September 2023, cumulative FDI equity inflows to India stood at US\$ 953.14 billion.
- In November 2023, the overall IIP (Index of Industrial Production) stood at 141. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 131.1, 139.2 and 176.3, respectively, in November 2023.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.55% in November 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As

per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 261,856 crore (US\$ 31.5 billion) in India during Aril-December (2023-24).

- The wheat procurement during RMS 2023-24 (till May) was estimated to be 262 lakh metric tonnes (LMT) and the rice procured in KMS 2023-24 was 385 LMT. The combined stock position of wheat and rice in the Central Pool is over 579 LMT (Wheat 312 LMT and Rice 267 LMT).

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

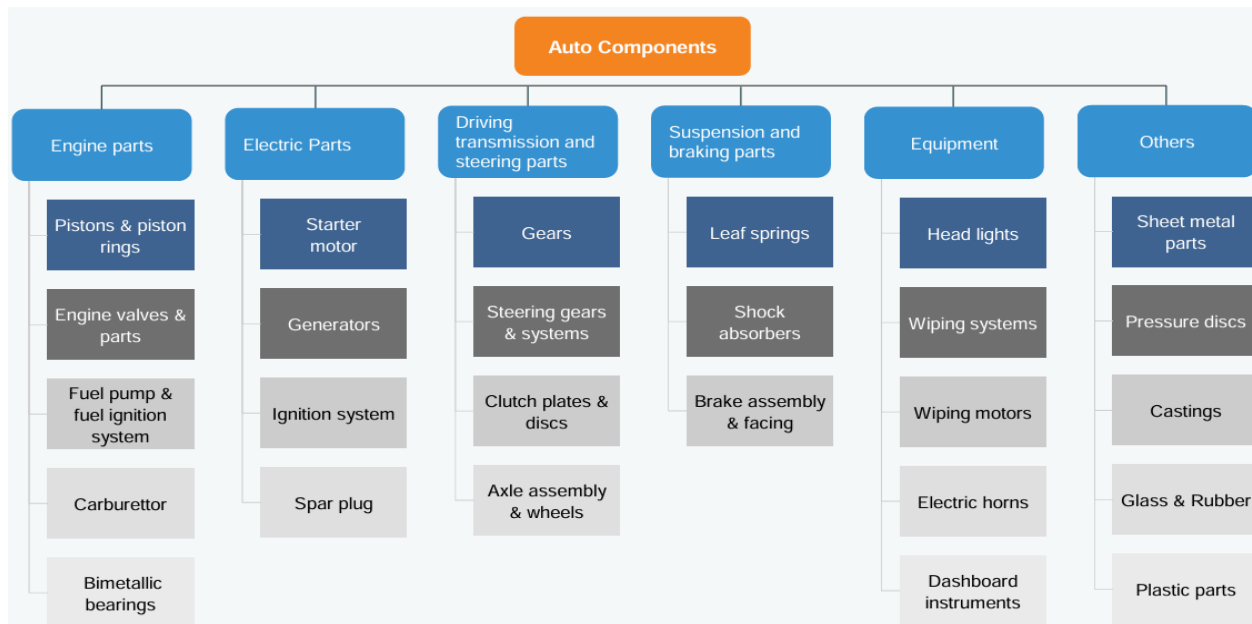

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record Rs.11.11 lakh crore (US\$ 133.5 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Our Business Process Flow:

Below exhibits the process flow of the company from procuring the material to the supply of the end products.

- **Raw Material Receipt (Carbon & Allot Steel)**

The major raw material required for our manufacturing activities are carbon steel or alloy steel. The selection of appropriate raw material is based on the requirements of the customers. The order for the raw material is placed based on the technical specifications and drawing provided by the customers. Vendor selections is done either according to approved list of customer's raw material supplier or according to the past records, quantity to be ordered and quality of material required.

- **Quality inspection**

On receipt of the material, the material is checked for the chemical composition required and the mechanical properties of the raw material.

- **Material Cutting**

The raw material i.e. steel bars received are then cut into smaller billets as per the product specification and the manufacturing plan prepared by the company. This activity is critical for the company as the accuracy of the finished product and material loss will depend upon the cutting activities.

- **Forging & Trimming**

The billets are then heated to precise temperatures and subjected to a forging process, where the metal is pressed, pounded, or squeezed under high force to create high-strength parts with the required shape and size. Our forging capabilities include forging presses and hammers.

- **Hardening / Normalizing (ISO Thermal Annealing)**

Once the forged components are produced, they undergo a crucial heat treatment process to achieve the required specifications for structure and hardness, among other factors. Some of our components also undergo heat treatment during the machining process to achieve specific structure, and hardness.

- **Shot Blast**

After the forging process, our components undergo further operations, such as shot blasting, which is a surface treatment process. Shot blasting involves directing high velocity steel abrasive shots in a controlled manner onto the surface that needs to be treated. This method is effective in achieving excellent cleaning and surface preparation for subsequent finishing operations. Shot blasting is an essential step in our manufacturing process, as it ensures that our components have a clean and uniform surface, free from any contaminants or imperfections. This process also enhances the adhesion of subsequent coatings or finishes, ensuring that our components have a long-lasting and durable finish.

- **Machining**

Machining is a critical process that involves transforming raw forgings into finished components with precise specifications in terms of size, shape, and other performance parameters. Machining operations are typically divided into two phases. First step involve the process that is used to remove large amounts of material to produces a shape close to the desired form but leaves some material on the piece for subsequent finishing operations. Under this step, the part achieves the final dimensions, tolerances, and surface finish.

- **MPI (Crack detection)**

This step involves conducting the magma flux crack detection test and Magnetic particle inspection test on the finished product to detect surface and subsurface flaws in finished goods. An MPI test involves magnetizing a component and applying magnetic particles to detect defects like cracks or discontinuities.

- **Dispatch**

Once the inspection of the finished goods are completed the material is packed as per the customer's specification and dispatched to the customers.

The accounting policies have been framed, keeping in view the fundamental accounting assumptions of Going Concern, Consistency and Accrual, as also basic considerations of Prudence, Substance over form, and Materiality. These have been applied consistently, except where a newly issued accounting standard is initially adopted or a revision in the existing accounting standards require a revision in the accounting policy so far in use. The need for such a revision is evaluated on an ongoing basis.

The Financial Statements have been prepared on a going concern basis, in as much as the management neither intends to liquidate the company nor to cease operations. Accordingly, assets, liabilities, income and expenses are recorded on a Going Concern basis. Based on the nature of products and services, and the time between the acquisition of assets and realization in cash or cash equivalents, the company has ascertained its operating cycle as 12 months for the purposes of current and non-current classification of assets and liabilities.

Change in Accounting Policy

The preparation of financial statements require estimates and assumptions to be made that affect the reported balances of assets as on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Accounting estimates could change from period to period. Actual results could differ from these estimates. Appropriate changes in estimates are made as and when the Management becomes aware of the changes in the circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which the changes are made and if material, their effects are disclosed in the notes to the financial statements.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. **Revenue recognition**

Revenue is recognized on transfer of property in goods or on transfer of significant risks and rewards of ownership to the buyer, for a consideration, without the seller retaining any effective control over the goods

Sales are accounted on dispatch of goods (which generally coincides with the transfer of ownership) and are exclusive of GST.

Other items of income including Interest, Discount etc. are accounted on accrual basis (depending on certainty of realization) and disclosed under the head "Other Income".

2. **Property, Plant & Equipments.**

Property, Plants and Equipment's are stated at their cost of acquisition or revalued amount (from the period when revaluation was done) less accumulated depreciation. The cost of acquisition includes freight, installation cost, duties,

taxes and other incidental expenses, identifiable with the asset, incurred during the installation / construction stage in order to bring the assets to their working condition for intended use, including borrowing costs capitalized, if any, but are net of Input Tax Credits (CENVAT, GST ITC and VAT) availed for the relevant element in the Cost.

3. **Depreciation**

Depreciation on assets is being provided on the Straight-Line Method on the basis of useful lives specified in Part C of Schedule II to the Companies Act, 2013. Normal Depreciation is normally debited to the Statement of Profit and Loss whereas the Depreciation on Revaluation Portion is adjusted against the respective Revaluation Reserve.

In case of those assets which were fully depreciated following the provisions of the Companies Act, 2013 and where such assets are in usable condition, the residual values of the said respective assets are considered at the maximum rate of 5%.

The details of useful life of an asset and its residual value estimated by the management are as follows:-

Type of Asset	Useful Life as per management's estimate
Factory Building	30
Plant & Machinery*	10-15
Electric Fittings	10
Vehicles*	8-10
Office Equipments	5
Furniture & Fixtures	10
Server	6
Computers & Software	3

*Company is having different class of assets which is having different useful lives.

In none of the case the residual value of an asset is more than five per cent of the original cost of the asset.

4. **Inventory**

Raw Materials are valued 'at Cost' or Net Realisable Value, whichever is lower on FIFO basis. 'Cost' includes all duties, taxes & other expenses incurred to bring the inventories to their present location and condition.

Finished products are valued at lower of cost or net realizable value.

Semi-Finished goods have been valued at Raw Material cost increased by a proportion of overheads in consonance with the stage of completion as certified by the management.

Stock of Scrap is value at its net realizable value.

5. **Employee Benefits**

Employee Benefits comprise short term as well as long term defined benefit as well as defined contribution plans.

Contributions to Provident Fund and Employee State Insurance are defined contributions. The Company's Contributions are charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due. There are no further obligations beyond the periodic contributions.

Retirement Benefits in form of Gratuity are defined benefit obligations and are provided for on the basis of actuarial valuation using projected unit credit method as at the balance sheet date. Actuarial gain / losses are immediately taken to the Statement of Profit and Loss and are not deferred.

6. **Foreign Exchange Transactions**

Transactions in foreign currency, to the extent not covered by forwards contracts, are recorded in Indian Rupees at the exchange rate prevailing on the date of the transactions. Exchange gains or losses on settlement, if any, are treated as income or expenditure respectively in the Statement of Profit and Loss. Liabilities in foreign currency as well as receivables in foreign currency as on the date of the Balance Sheet have been restated into Indian rupees at the rates of exchange prevailing as on the date of Balance Sheet.

7. **Impairment**

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment

loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

8. Lease accounting

Leases are classified as operating leases where the lesser effectively retains substantially all the risks and benefits of the ownership of the leased assets. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on accrual basis.

9. Borrowing costs

According to AS-16, the borrowing costs directly attributable to the acquisition of qualifying assets are to be capitalized for the period until the asset is ready for its intended use. A qualifying asset being, an asset that necessarily takes a substantial period of time to get ready for its intended use. Other borrowing costs are to be recognized as an expense in the period in which they are incurred.

10. Taxes on income

Provision for taxation for the year under report includes provision for current tax as well as deferred tax.

Provision for Current tax is made, based on tax estimated to be payable as computed under the various provisions of the Income Tax Act, 1961.

Deferred tax is recognized, subject to prudence, on timing differences between taxable income and accounting income that originate during the year and are capable of being reversed in one or more subsequent periods. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that future taxable income will be available against which such deferred tax assets can be realized. Deferred Tax Liabilities / Assets are quantified using the tax rates and tax laws enacted or substantively enacted as on the balance sheet date.

11. Provisions and contingent liabilities

Provisions requiring a substantial degree of estimation in measurement are recognized, if in the opinion of the Management, there is a probability that a present obligation as a result of past events will result in an outflow for the Company in the future. Contingencies, the outcome of which is not certain, have been disclosed in these notes as Contingent Liabilities. Contingent Assets are neither recognized nor disclosed in the financial statements.

12. Impairment of Assets

Assessment of Impairment of Assets (as covered under AS-28 Impairment of Assets) is done as at the Balance Sheet Date considering external and internal impairment indicators. If there is an indication that an asset may be impaired, its recoverable amount is estimated and the impairment loss duly provided for.

13. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

14. USE OF ESTIMATES

The preparation of financial statements required the management to make estimates and assumptions that affect the reported balance of assets and liabilities, revenues and expenses and disclosures relating to contingent liabilities. The Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Future results could differ from these estimates. Any revision of accounting estimates is recognized prospectively in the current and future periods.

15. ACCOUNTING FOR TAXES ON INCOME

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

(i) Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

(ii) Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

16. **CONTINGENT LIABILITIES AND PROVISIONS**

Provisions are recognized only when there is a present obligation as a result of past events and when a reliable estimate of the amount of obligation can be made.

Contingent Liability is disclosed for

- a) Possible obligation which will be confirmed only by future events not wholly within the control of the Company or
- b) Present obligations arising from the past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.
- c) Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

17. **EARNINGS PER SHARE:**

In determining the Earnings Per share, the company considers the net profit after tax which does not include any post tax effect of any extraordinary / exceptional item. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period. For the purpose of EPS, we have considered those number of Equity shares during the entire period of restatement which were outstanding as at 31 December, 2023.

18. **Derivatives**

The Company is exposed to foreign currency fluctuations on foreign currency assets and forecasted cash flows denominated in foreign currency. For this the Company enters into forward exchange contracts, where the counter-party is a Bank. These forward contracts are not used for trading or speculation purposes.

In case of forward contracts the gain or loss arising on exercise of option or settlement or cancellation are recognized in the Statement of profit and loss for the period. The forwards contracts outstanding as at the balance sheet date, if any, are marked-to-market and corresponding exchange gain or loss recognized on the same.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. (Non-debt Instruments) Rules, 2019.
