SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

April 2025 was characterised by several geopolitical and economic developments. The United States announced, implemented, and eventually paused a targeted tariff regime, pending further bilateral negotiations. These developments engendered heightened uncertainty across the global economy. The IMF's World Economic Outlook (WEO) April 2025 has projected a marked drop in global growth rates for 2025 and 2026. Inflation trajectories towards central bank targets will now be slower and more drawn-out in advanced economies and quicker in emerging economies, compared to projections in the WEO October 2024. As a result, central bank policy rate pathways have begun to diverge, leading to potential implications for capital flows and financial markets. As countries continue to negotiate, the US announced interim trade deals with the UK and China in the first half of May 2025.

Assistant/Deputy Registrar of Companies, Mumbai Vs. India Steel Works Limited (ISWL), Ms. Saachi Rajesh Madnani and Others

A Summon Case Numbering SS/18/2025 (CNR: MHMM140006832025) is filed by Assistant/Deputy Registrar of Companies, Mumbai in the court of Additional Metropolitan Magistrate, Girgaon, Mumbai in relation to Section 148(8) and Section 129(7) of the Companies Act, 2013 against India Steel Works Limited (ISWL), Ms. Saachi Rajesh Madnani (being an Independent Director in the ISWL from the period from June 23, 2023 to September 4, 2023) & Others. A Show-Cause Notice dated August 30, 2023 was received (through email) by the Company from Ministry of Corporate Affairs, Cost Audit Branch in relation to non-compliance of provisions of Section 148 of the Companies Act, 2013. That said notice stated that the company (ISWL) falls under the ambit of Cost Audit for the financial year ending 31st March 2021 but has not filed the Cost Audit Report in prescribed Form to the Central Government within the statutory time limit prescribed by Section 148 (6) of the Companies Act, 2013. As per the said notice, as per the provision of Section 20 of the Companies Act, the notice was served on the officers of the company (including Ms. Saachi Rajesh Madnani) who was Independent Director as per Portal of Ministry of Corporate Affairs at that time.

The matter pertains to period in which Ms. Saachi Rajesh Madnani, Company Secretary and Compliance Officer was not associated with the company (ISWL) in any capacity. The matter is pending on the respective court website with her being one of the Respondents. Ms. Saachi Rajesh Madnani has not received any notice/communication from Ministry of Corporate Affairs or Additional Metropolitan Magistrate, Girgaon, Mumbai pertaining to the said matter. The next date of hearing as per the e-court website in the matter is fixed as November 25, 2025.

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors and Group Companies see “*Outstanding Litigations and Material Developments*” beginning on page 195.

2. *There may be potential conflicts of interest if our Promoters, Promoters’ Group entities who are involved in same business activities that compete with or are in the same line of activity as our business operations.*

Any conflict of interest which could occur between our business and any other similar business activities pursued by our Director, Promoter and Promoter Group entity, could have a material adverse effect on our business and results of operations. Our Group Companies, Krizz Mart Private Limited, JK Fabtex Industries Private Limited are engaged in same line of business. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and in circumstances where our respective interests diverge. Further, our Company has entered into separate non-compete agreement in order to avoid the conflict of interest envisaged with our group company. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations. For further details of conflict of interest please refer chapter titled “*Information with respect to Group Companies*” on beginning on page no 212 of this Red Herring Prospectus.

3. *Our revenue is concentrated in the state of Gujarat and Maharashtra and any adverse developments affecting Gujarat and Maharashtra could have an adverse effect on our business, results of operations and financial condition.*

We generate majority of our revenue from the state of Gujarat and Maharashtra. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in the state of Gujarat and Maharashtra or any changes in the policies of the state or local governments of this state or in the Government of India could require us to incur significant capital expenditure and change our entire business strategy in parts or in entirety. The occurrence of our inability to effectively respond to any such event or adapt to the changes in such policies could have an adverse effect on our business, results of operations, financial condition and cash flows.

4. *We have had made non-compliances of certain provision under Companies Act, 2013.*

Our Company has past made certain inadvertent erroneous filings under Companies Act, 2013 and 1956. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings, amended from time to time, as mentioned below:

- There was typographic and clerical error in the list of allottees attached in Form 2/form PAS 3 such as number of shares allotted are incorrectly mentioned, shares were allotted in the name of proprietary concern and supposed to be allotted to individual, shares were registered in the name of partnership firm instead of name of partners of the firm.

Our company has taken significant steps to address above non-compliances and ensure ongoing compliance with regulatory requirements. We have filed compounding application on April 24, 2025 under section 441 of the Companies Act, 2013 for the offence under section 75/39 of Companies Act, 1956/2013 read with section 450 of the Companies Act, 2013. Detailed note of the said application is mentioned in RF 11

- There is clerical error in attachment of list of shareholders in the Annual Return form filed for Financial Year 2015-16, the attachment is incorrect.

Our company has taken significant steps to address above non-compliance and ensure ongoing compliance with regulatory requirements. We have filed a compounding application on April 24, 2025 under section 441 of the Companies Act, 2013 for the offence under section 92 of Companies Act, 2013 read with section 450 of the Companies Act, 2013.

The above compounding application has been duly compounded and the requisite penalty has been paid by the Company.

Our Company has, in the past, experienced delays in the filing of certain forms with the Registrar of Companies (ROC) as required under the Companies Act, 2013. These delays could potentially attract penalties, fines, and other regulatory actions against our Company, which may adversely affect our financial condition and reputation.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure you that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

No penalties were imposed by the Statutory Authority. The delay was regularised by the filing the forms with additional fees. Till date no penalty has been imposed by the statutory authority and all the filings have been regularised by filing with additional fees. However, in future if any fine or penalty is levied by the statutory authorities, it will impact the financials of the Company depending on the quantum of fine or penalties levied.

The Company now have appointed a whole time Company Secretary and one assistant in the secretarial department who are responsible to ensure ROC filings are done in time and without any error by following proper maker and checker mechanism.

5. ***We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.***

Quality of our product is very important for our customers and their brands equity. We conduct quality tests on raw materials and final products to ensure that they meet the required specifications. Our Company is committed to provide quality products to our customers. Failure of our products to meet prescribed quality standards may results in rejection and replacement of product. Any failure on our part to successfully maintain quality standards for our products may affect our business and operations.

6. ***The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.***

Our top ten customers contribute 81.00%, 67.20%, 78.54% and 77.08 % of our total sales for the period year ended June 30, 2025 and for the financial year ended on March 31, 2025, 2024 and 2023, respectively. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

7. ***The Company is dependent on few suppliers for purchase of product. Loss of any of these large suppliers may affect our business operations.***

Our top ten suppliers contribute 64.04%, 60.30%, 69.69% and 62.02 % of our total sales for the period year ended June 30, 2025 and for the financial year ended on March 31, 2025, 2024 and 2023, respectively. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations.

However, the composition and amount of purchase from these suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

8. *Our Restated Financial Statements are prepared and signed by the Peer Review Auditor who is not Statutory Auditors of our Company as required under the provisions of ICDR.*

The Restated Financial Statements of our Company for the period ended June 30, 2025 and for the financial year ended on March 31, 2025, 2024 and 2023 respectively are prepared and signed by M/s Shambhu Gupta & Co, Chartered Accountants, the Peer Review Auditor of our Company who is not statutory auditor of our Company.

Our Statutory Auditor M/s Borkar & Muzumdar, Chartered Accountants holds Peer Reviewed Certificate number-019723 which is valid till May 31, 2028.

9. *Our cost of production is exposed to fluctuations in the prices of raw material prices particularly yarn, fabrics and accessories and we have not entered into any agreement in respect of long-term supply for raw materials required by us.*

The raw material consumption contribution is 88.12 %, 89.12 %, 89.90% and 90.7 % of revenue from manufacturing activities for the period ended June 30, 2025 and for the financial year ended on March 31, 2025, 2024 and 2023 respectively. The industry in which we operate is exposed to fluctuations in the prices of yarn, fabrics and accessories and we may be unable to control factors affecting the price directly or indirectly at which we procure our raw material, particularly as we typically do not enter into any long term supply agreements with our suppliers and our major requirement is met in the spot market. We may at times also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our products becoming unaffordable for a particular segment of demography, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins. Upward fluctuations in the prices of raw material may thereby affect our margins directly or indirectly and thereby have a direct bearing on our profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

10. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.*

As on March 31, 2025, our Company has employed 191 employees which includes 26 contract employees. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers our business could be adversely affected. For further details please refer human resource details in chapter titled “Business Overview” on beginning on page no 123 of this Red Herring Prospectus.

Further, there are instances where we need to hire additional contract labour, either for specialised jobs or during periods of high customer orders. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

11. *Our company has taken significant steps to address non-compliances and ensure ongoing compliance with regulatory requirements by filed compounding application.*

Our company has taken significant steps to address below non-compliances and ensure ongoing compliance with regulatory requirements. We have filed compounding application on April 24, 2025 under section 441 of the Companies Act, 2013 and for the offence under section 75 of Companies Act, 1956:

1. Shares were originally allotted to M/s. VK Silk Mills, Partnership Firm and currently the said shares are registered in the name Mr. Harshil Manish Shah and Mr. Naman Shah, partners of said partnership firm. We have taken significant steps to address above non-compliances and ensure ongoing compliance with regulatory requirements.
2. Mrs. Asha Manish Shah was allotted 31334 Equity Shares on December 12, 2011 in the name of M/s. S.R. Textiles (proprietary concern of Mrs. Asha Manish Shah) of however, the said shares were supposed to be allotted in the name of Mrs. Asha Manish Shah.
3. Mrs. Asha Manish Shah was allotted 18000 Equity Shares on March 30, 2013 in the name of M/s. S.R. Textiles (proprietary concern of Mrs. Asha Manish Shah) however, the said shares were supposed to be allotted in the name of Mrs. Asha Manish Shah.

4. Mrs. Asha Manish Shah was allotted 144567 Equity Shares on August 01, 2018 in the name of M/s. S.R. Textiles (proprietary concern of Mrs. Asha Manish Shah) however, the said shares were supposed to be allotted in the name of Mrs. Asha Manish Shah.

We have taken significant steps to address above non-compliances and ensure ongoing compliance with regulatory requirements. We have filed compounding application under section 441 of the Companies Act, 2013 and for the offence under section 39/75 of Companies Act, 2013/1956 and order for the same is awaited.

Further to this we would like to clarify that the matter pertains merely to a clerical error in the attachments filed during the earlier years, and that the corresponding returns filed were otherwise in order. As per the advice sought from Practicing Company Secretary, since there was a sheer clerical error, hence the said Forms can be refiled with additional fee (penalty) and corrections can be done.

It may be noted that the Company has rectified the said clerical error in its latest Annual Return (Form MGT-7) and has filed revised Form PAS-3 for the respective years to ensure full compliance and correctness of its records. Further, since the said compounding application for rectifying the offence was filed by the officer in default and accordingly penalty may be levied on the Officer in Default, the same does not create any material liability on the Company.

12. We generally do business with our customers on purchase order basis and do not enter into long-term contracts with them.

Our business is heavily reliant on the continuous and stable demand of our products from our customers. We operate on a purchase order basis and do not have long-term contracts or exclusive marketing tie-ups for our products. Furthermore, our Company has not appointed any exclusive agents for handling its operations. Any significant change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

13. We have entered into a number of related party transactions and may continue to enter into such transactions under AS 18, in the future, and there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

We have, in the past, entered into related party transactions with various parties. While we believe that our past related party transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance to you that such transactions in the future or any other future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, cash flows, financial condition and results of operations. Further, the such transactions in the future or any future transactions with our related parties, either individually or in the aggregate, may potentially involve conflicts of interest. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favour. For further details of related party transaction please refer chapter titled "Restated Financial Information" on beginning on page no 178 of this Red Herring Prospectus.

For further details please refer immovable property details in chapter titled "Offer Documents Summary" and "Restated Financial Information" on beginning on page no 19 and 178 of this Red Herring Prospectus.

14. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows based on Restated Financial Statements is summarized in below table and our Company has reported negative cash flow in the financial years is as mentioned below, which could affect our business and growth:

(₹ in Lakhs)

Particulars	For the period ended June 30, 2025	For the year ended March 31		
		2025	2024	2023
Net Cashflow from operating Activities	437.23	814.22	914.41	840.73
Net Cashflow from Investing Activities	(257.53)	(23.47)	(663.67)	(136.27)
Net Cashflow from Financing Activities	(166.74)	(780.03)	(245.02)	(710.84)

15. Our Company depends on timely identification of evolving fashion trends and creating new designs. Any lag on the part of our Company in this regard may adversely affect our business operations.

The key success factor in the textiles business is in creating appealing designs and colour combinations to create buyer

appeal. In order to be in line with this success factor, we maintain a team of in house designers who design and develop the products as per customer's needs. This team works on the development of designs by analyzing the needs of clients by parameters like latest dyeing combinations, new printing techniques & patterns and most importantly the feedback gained from the sales of the similar products that were designed earlier. Our inability to tap the changing fashion can lead to rejection and obsolescence of our textiles thus damaging goodwill, business operations and financial conditions. Any failure to update ourselves or understand the trends in different regions of the world may result in reduction of our export sales, adversely affecting our financial condition.

16. *We have high financial indebtedness which could adversely affect our financial condition and results of operations and further we may not be able to meet our obligations under the debt financing agreements.*

We have secured loan aggregating to Rs. 6628.22 lakhs as on June 30, 2025 as per restated audited financial statements from commercial banks. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. For further details please refer the chapter "Restated Financial Information" on Page 178 of this Red Herring Prospectus.

17. *Delays or defaults in client payments could affect our business, financial condition and results of operations.*

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

18. *We intend to utilise a significant portion of the Net Proceeds for funding our capital expenditure requirements and prepayment of secured borrowings. We are yet to place orders for such capital expenditure machinery.*

We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements and prepayment of secured borrowings, which include for full or part repayment and/or prepayment of certain outstanding secured borrowings availed by our Company and the purchase (replacement) of new machinery for the manufacturing. While we have obtained quotations from vendor in relation to the major machinery and equipment required for funding such capital expenditure, we are yet to place orders for such machinery and equipment. Accordingly, estimated cost of ₹ 314.73 lakhs, purchase of new machinery. We are yet to place orders for any of the components of the Proposed Project. There can be no assurance that we will be able to place orders for such machinery and equipment in a timely manner or at all. Further, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. For further details, please refer to the chapter titled "Objects of the Issue" beginning on page 88 of this Red Herring Prospectus.

19. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operational and financial conditions.*

The market for our products is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, various products line, customer base, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive.

Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

20. *Under-utilization of our manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

We operate one manufacturing facility in Umbergaon, Valsad, Gujarat with an aggregate installed production capacity as mentioned below:

For the year/ period ended	Existing installed capacity (MTR)	Actual Production (MTR)	% of actual production to installed capacity
March 31, 2023	15000000	12248952	81.66%
March 31, 2024	20000000	18533596	92.67%
March 31, 2025	20000000	19196137	95.98%
June 30, 2025 (for 3 months)	5000000	4807498	96.15%

Source: Based on certificate of Er. Parth P Patel., Chartered Engineer dated November 05, 2025.

The production capacity has not been fully utilized in FY 2021-22 primarily due to the adverse impact of the COVID-19 pandemic and subsequent unfavourable market conditions. The disruptions caused by the pandemic, including supply chain constraints, reduced consumer demand, and overall economic slowdown, significantly affected operations across the industry.

In year 2022-23 when the utilisation of the Company was around 82%, the Company had imported 24 PICANOL machineries from Taiwan in order to adopt latest technology. The production was affected at the time of installation of these machines.

In year 2024-25 and for stub period of Jun 25 the utilisation of manufacturing capacities are around 95.98% and 96.15% respectively which according to the Company are optimum as there are maintenance of machines/factories owing to which it is not possible to achieve 100% capacity utilisation.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our customers. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

There can be no assurance that we will be able to register the said trademark and the logo in future or that, third parties who have filed objection will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details, please see the chapter titled “Government Approvals” beginning on page 199 of this Red Herring Prospectus.

22. The shortage or non-availability of power facility may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.

We utilize the services of Dakshin Gujarat Vij Company Limited for our power needs in the manufacturing process. We are mainly dependent on the State Government for meeting our electricity requirements, any defaults or non-

which could cause indirect injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of particular types of accidents which could adversely hamper our cash flows and profitability.

In the year 2006, there was an incident of fire at our corporate office due to defective electric circuit. It caused loss of office records and documents due to fire, heat, smoke and water. The loss of records includes accounting and financial records, bank statements, registers, forms filed with Registrar of Companies etc. maintained in physical form. Currently we do not have any insurance to cover the property of Registered office where the books of account are to be maintained. Occurrence of fire in office premises may leads to financial loss, property damage, business disruption etc.

There were no incidents in the past of accidents at production facility owing to which there was major injury to employees or loss to them Company.

28. Our insurance coverage may not be adequate.

Our Company has obtained insurance coverage in respect of certain risks. We have taken insurance policies such as Vehicle insurance and Standard Fire Policy for our manufacturing facility, machineries, factory premises and inventories. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like loss of profits, losses due to terrorism, etc. Further, there can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “Our Business” beginning on page 123 of this Red Herring Prospectus.

29. Our registered office premise, manufacturing facility and godown are on a leasehold/license basis and any termination of such lease/license and/or non-renewal could adversely affect our operations.

The property on which our registered office and godown situated are on a leave and license basis and the property on which manufacturing facility situated is on lease basis. Any termination of the licenses whether due to any breach or otherwise, or nonrenewal thereof, could temporarily disrupt our functioning and adversely affect the business operations. The registered office premise is owned by our promoter group entity. For further details, please refer to chapter titled “Our Business” beginning on page 123 of this Red Herring Prospectus.

31. Increases in interest rates may materially impact our cash flows and results of operations.

All of our secured debt carries interest at floating interest rates or at rates that are subject to adjustments at specified intervals. We are exposed to interest rate risk in respect of contracts for which we have not entered into any swap or interest rate hedging transactions, although we may decide to engage in such transactions in the future. We may further be unable to pass any increase in interest expense to our existing customers. Any such increase in interest expense may have a material adverse effect on our business, financial condition, results of operations and cash flows. Furthermore,

if we decide to enter into agreements to hedge our interest rate risk, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us fully against our interest rate risk.

32. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution network and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

33. *Our failure to identify and understand evolving industry trends and preferences and to develop new products to meet our customers' demands may materially adversely affect our business.*

Changes in the preferences of our customers, regulatory or industry trends or requirements, or in competitive technologies may render certain of our products or business strategies obsolete or less attractive. To compete effectively in the automotive components industry, we must be able to develop, upgrade and manufacture new products to meet our customers' demand in a timely manner. In order to do so, we need to identify and understand the key market trends and address our customers' evolving needs proactively and on a timely basis. As a result, we may incur, and have in the past incurred, capital expenditures for development of products to meet the demands of our customers. We cannot assure you, however, that we will be able to install and commission the equipment needed to manufacture products for our customers on time. Our failure to successfully and timely develop and manufacture new products in order to cater to the requirements of our customers and industry trends could have a material adverse effect on our business, financial condition, cash flows, results of operations and future prospects.

34. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

35. *Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business and our inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals for our business operations could materially and adversely affect our business, prospects, results of operations and financial condition.*

Our business requires us to obtain and renew from time-to-time certain approvals, licenses, registrations and permits. For further details, see "Government Approvals" on page 199. The approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by various authorities may contain conditions, some of which could be onerous. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, it will have an adverse impact on our business operations. We hold the Professional Tax Registration Certificate (PTRC), but our Professional Tax Enrolment Certificate (PTEC) for State of Maharashtra under the Maharashtra State Tax on Professions, Trades, Callings and Employments Act, 1975 is currently untraceable, though we have been filing the returns. Since we have already applied to amend the PTEC to reflect our name change from *K K Silk Mills Private Limited* to *K K Silk Mills Limited*, we will receive a copy of the PTEC certificate with the new name also.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. For further details, see "Government and Other Statutory Approvals" on page 199 of this Draft Prospectus. In the event that we are unable to obtain such approvals in a timely manner or at all, our business operations may be adversely affected. We may be involved in any environmental legal proceedings in the course of our business due to non-compliances with terms and conditions of regulatory approvals or authorizations.

36. *We have not entered into any technical support service for the maintenance and smooth functioning of our equipment's and machineries, which may affect our performance.*

Our manufacturing processes involve daily use of technical equipment's and machineries. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Our Company has not entered into any technical support service agreements with any competent third party. However, we have in-house technical support team which maintain the equipment's and machineries on regular basis. Our failure to reduce the downtime in as such events occur may adversely affect our productivity, business and results of operations.

37. *Our inability to accurately forecast demand for our products, and accordingly manage our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.*

Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations. We do not have firm commitment long term supply agreements with our customers and instead rely on short term purchase orders to govern the volume and other terms of the sales of products. Accordingly, we plan our production volumes based on our forecast of the demand for our products. Any error in forecasting could result in surplus stock which would have an adverse effect on our profitability.

On the other hand, in the event that the demand we have forecasted is lower than the actual demand of our products, and we are unable to ramp up production to match such demand, we may be unable to supply the requisite quantity of products to our customers in a timely manner. Any increase in our turn-around time could affect our production schedules and disrupt our supply, which could have an adverse effect on our business, cash flows, financial condition and results of operations.

38. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook.

Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

39. *We rely on third-party transportation providers for procurement of raw materials and for supply of our products and failure by any of our transportation providers could result in loss in sales.*

We depend on road transportation to deliver our finished products to our customers. We use commercial vehicles and third-party transportation providers for procuring our raw materials as well as for distributing our products to our customers. This makes us dependent on various intermediaries such as domestic logistics companies and container freight station operators. Weather-related problems, strikes, or other events could impair our ability to procure raw materials from our suppliers or the ability of our suppliers to deliver raw materials to us which may in turn delay the process of manufacturing and supplying our products to our customers, leading to cancellation or non-renewal of purchase orders, and this could adversely affect the performance of our business, results of operations and cash flows. We have not entered into formal agreement with any of our transportation provider. Additionally, if we lose one or more of our third-party transportation providers, we may not be able to obtain terms as favourable as those we receive from the third-party transportation providers that we currently use, which in turn would increase our costs and thereby adversely affect our operating results.

40. *Fluctuation in the exchange rate between the Indian rupee and foreign currencies may have an adverse effect on our business.*

Although we follow established risk management policies, including the use of derivatives, such as foreign exchange forward contracts to hedge our exposure to foreign currency risks, we are nevertheless exposed to risks from foreign exchange rate fluctuations since our business is dependent on exports entailing large foreign exchange transactions, in currencies including the USD. Exchange rates between some of these currencies and the Indian rupee in recent years have fluctuated significantly and may do so in the future, thereby impacting our results of operations and cash flows in Indian rupee terms.

The exchange rate between the Rupee and other currencies is variables and may continue to fluctuate in future. Fluctuations in the exchange rates may affect the Company to the extent of cost of goods traded in foreign currency terms. Any adverse fluctuations with respect to the exchange rate of any foreign currency for Indian Rupees may affect the Company's profitability, since a significant part of trading is done in foreign currency.

41. Our promoters will continue to retain significant control over our Company after the Public Issue.

Our Promoters and the members of the Promoter Group will continue to own majority of our Equity Shares constituting [●] % of the paid-up equity share capital of our Company. As a result, our promoters will be in a position to influence any shareholder action or approval requiring a majority vote, except where it is required otherwise by applicable laws or where they abstain from voting. Our promoters will also have the ability to control our business including matters relating any sale of all or substantially all its assets, the timing and distribution of dividends and the election or termination or appointment of its officers and directors. Further, the extent of the promoters' shareholding in the Company may result in the delay or prevention of a change of management or control of the Company, even if such a transaction may be beneficial to the other shareholders of the Company.

42. Our Promoters Directors may have interest in our Company other than normal remuneration or benefits and reimbursement of expenses incurred.

Our Promoters Directors may be deemed to be interested in our Company, in addition to normal remuneration or benefits and reimbursements of expenses, to the extent of Equity Shares or other securities, held by them and their relatives (if any) and their dividend or bonus entitlement, and benefits arising from their directorship in our Company and are also interested to the extent of sitting fee payable to them for attending each of our Board and Committee Meetings.

43. We are heavily dependent on our Directors and Key Managerial Personnels for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Directors and Key Managerial Personnels. We depend significantly on them for executing our day-to-day activities. The loss of any of our Director or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Director and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section "Our Management" on page 157 of this Red Herring Prospectus.

44. The average cost of acquisition of Equity shares by our Promoter is lower than the Issue price.

Our Promoter's average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoter	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹) *#
1.	Mr. Manish Kantilal Shah,	3848600	4.40
2.	Mr. Nilesh Kantilal Jain	5436336	2.68

45. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected. However, there is no instance of misconducts or any major error by the employees in past.

46. Our Promoters, members of Promoter Group and director have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoters, members of promoter group and director have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked by promoters, members of Promoter

group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

47. *Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 88 of this Red Herring Prospectus.

48. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “*Basis for Issue Price*” beginning on page 98 of this Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

49. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ ₹ 5000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

50. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” of this Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to deploy the Net Issue Proceeds in financial year 2025-26, 2026-27 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “*Objects of the Issue*” on page 88 of this Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “*Objects of the Issue*” on page 88 of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

51. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “*Objects of The Issue*” on Page no. 88 of this Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

52. *Our funding requirements and the proposed deployment of Net Proceeds are based on management estimates and have not been appraised by any bank or financial institution or any other independent agency and may be subject to change based on various factors, some of which may be beyond our control. We have not entered into any definitive agreements to utilise certain portions of the Net Proceeds of the Issue.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “*Object for the Issue*” beginning on page 88 of this Red Herring Prospectus.

53. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

54. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

56. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined through the Book building process. This price is based on numerous factors. For further information, see “*Basis for Issue Price*” beginning on page 98 of this Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed After Trade Broking Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

3. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity

Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

4. *Our operations are subject to environmental, health and safety laws and regulations.*

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the various locations in India where we operate. In particular, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liability to the Government and third parties, and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Red Herring Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in Defense or prosecution of such legal proceedings or cause delays in the construction, development or commencement of operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

5. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

6. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

7. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

8. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

9. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause

interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

10. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

The data may have been re-classified by us for the purpose of presentation. GLOBAL ECONOMIC OVERVIEW

In all, global growth prospects have substantially weakened since January, with some of the downside risks related to trade having materialized in recent months—most notably, a significant increase in trade barriers and policy uncertainty. In view of these developments, the forecasts assume that tariff rates in place as of late May prevail throughout the forecast horizon. Accordingly, previously announced pauses to tariff hikes between the United States and its trading partners are assumed to be extended with at most limited modifications. In this context, global growth is projected to slow markedly to 2.3 percent in 2025—the slowest pace since 2008, aside from two years of outright global recession in 2009 and 2020. Over 2026-27, a pickup in domestic demand is expected to lift global growth to a still-subdued 2.5 percent—far below the pre pandemic decadal average of 3.1 percent (figure 1.11.A). The expected deterioration in growth is broad-based, with many of the world's economies likely to experience slower growth relative to last year as well as previous forecasts (figure 1.11.B). EMDEs with tight trade and investment linkages with the three largest economies—the United States, euro area, and China—are expected to be adversely impacted by the spillovers from a concurrent slowdown in these economies this year (figures 1.11.C and 1.11.D).

Although central banks are anticipated to continue lowering monetary policy rates, the future path of interest rates is uncertain considering the potential risks that higher tariffs pose for the disinflation process, particularly in the United States. Fiscal policy is assumed to be broadly neutral in many economies, excluding some European countries where increased defence and infrastructure spending is included in the baseline. In some major economies, aggregate fiscal policy shifts could prove materially more expansionary than the baseline assumptions.

Against this backdrop, global trade and investment growth are also expected to be notably lower relative to previous projections, mostly owing to a sharp deterioration in business and consumer confidence. Uncertainty about future trade policies is likely to amplify the negative effect of increased trade barriers on near-term investment and activity, especially as firms delay or reconsider capital spending, which tends to be trade-intensive (IMF 2018; Kose, Ohnsorge et al. 2017). As global trade and investment weaken, labor demand and private consumption growth in key advanced economies are also set to slow. Although some countries may benefit from trade diversion in the short run depending on the distribution of tariffs across U.S. trading partners, mounting trade restrictions could disrupt global value chains, contributing to higher prices in some sectors. Protectionism, if it becomes entrenched, is also likely to stifle cross-border flows of commerce, capital, and technology in the longer term, weighing on productivity and global potential growth.

Downside risks to the outlook continue to dominate (figure 1.12.A). Higher or more persistent trade policy uncertainty presents a major risk to global trade, investment, and overall activity. Renewed increases in trade tensions and barriers could further weigh on consumer and business confidence, weakening demand. A reappraisal of risk appetite and deleveraging in financial markets could generate financial stress that curbs economic activity globally, with large capital outflows from vulnerable EMDEs. Some major economies may experience a mutually reinforcing combination of downside risks, resulting in notably weaker growth with adverse global spillovers. Increased conflict and geopolitical stress, as well as more frequent and intense natural disasters, could also push growth below expectations. On the upside, the drag from uncertainty and increased trade barriers could be attenuated if negotiations give rise to tariff reductions between major economies. In addition, global growth could be stronger than projected due to a technology-led investment boost and additional fiscal spending in major economies—though the latter could also generate inflationary pressures and undermine efforts to restore medium-term fiscal sustainability.

Downside risks Persistently elevated policy uncertainty Policy uncertainty—especially about trade policy—remains very high. The imposition of higher trade barriers has already unsettled financial markets and dampened business and consumer sentiment. Despite recent trade negotiations, concerns remain that global trade tensions could escalate in unpredictable ways. The speed and scope of policy shifts have also made it challenging for firms to plan, leading to reduced capital investment and hiring plans.

FIGURE 1.11 Global outlook

Global growth is anticipated to weaken in the near term, reflecting a sharp increase in trade barriers and heightened uncertainty. The deterioration in growth prospects is expected to be broad-based, affecting most of the world's economies. The slowdown this year in the three major engines of global growth—the United States, euro area, and China—is expected to dampen activity in other EMDEs, especially those with tight trade and investment linkages to these economies.

A. Contributions to global growth

B. Share of economies with slowing/downgraded growth in 2025

C. Trade and financial linkages between major economies and EMDEs excluding China

D. Share of economies for which the United States is a major goods export destination, 2010-23

The duration of this period of acute uncertainty could be a key determinant of global growth, on top of the direct impacts of policies that are enacted. In the baseline, uncertainty is expected to wane as tariff rates stabilize and trade patterns adjust. If, however, elevated uncertainty persists for longer or rises further over the forecast period, the adverse implications for economic activity could compound, pushing global growth notably below expectations.

An unexpected rise in trade policy uncertainty could weigh more on the sentiment of consumers, investors, and businesses, which, in turn, would have adverse impacts on output and employment globally, especially in export-intensive industries. A sharp further increase in uncertainty, particularly for an extended period, would likely drive EMDE investment and growth markedly lower (figure 1.12.B). It could, for example, delay investments in productive capacity in exporting countries, speed up exit of firms from exporting industries most likely to be affected by tariffs, and lead to costly trade diversion (Crowley, Exton, and Han 2020; Douch, Du, and Vanino 2019; Handley and Limão 2019). Weaker investor sentiment and a lack of clarity over future trading arrangements could particularly curtail the flow of FDI linked to establishing supply chains, which has historically been a major driver of economic development.

FIGURE 1.12 Risks to the outlook

Downside risks continue to dominate. Further uncertainty would lower EMDE investment and growth. Despite recent market turmoil, risk premia in key markets remain relatively narrow, leaving asset prices vulnerable to large negative adjustments. A marked slowdown in major economies, especially the United States, would have sizable adverse spillovers. A rising number of EMDEs face acute risks from armed conflicts, which have proliferated in recent years, often culminating in deep recessions. Globally, a downside scenario of renewed trade tensions could push global growth sharply lower. In contrast, an upside scenario of trade negotiations that de-escalate tensions could mitigate the expected slowdown in global growth.

A. Probability distribution around global growth forecast

B. Impact of 10-percent rise in global EPU on activity in EMDEs

C. Financial market risk premia

D. Output response in EMDEs excluding China to a 1-percentage-point decrease in U.S. growth

E. Cumulative loss of per capita GDP following the onset of high-intensity conflicts

F. Change in global growth in alternative scenarios

Escalation of trade tensions

Although the baseline encompasses a significant increase in trade barriers, there remains a substantial risk that the trend of rising trade protectionism and inward-looking policies in major economies intensifies further. This could include a reversion to previously announced higher tariffs and the reintroduction and expansion of retaliatory measures. A renewed escalation in trade tensions and trade costs would amplify their negative consequences for the global economy. Such an outcome might become more likely if tariffs and ongoing shifts in trading relations put downward pressure on export prices in large goods exporters, such that domestic producers in economies that have not increased import levies face suddenly intensifying competition.

Further increases in tariffs would likely lead to higher inflation in the implementing jurisdictions (Amiti, Redding, and Weinstein 2019). Prices for imported consumer and intermediate goods would rise directly, with at least a sizable portion of tariffs likely to be passed on to domestic buyers. In the near term, substitution toward domestic alternatives would not be feasible for every product affected—such adjustments would take time and be costly. This would further push up prices—including on domestically assembled products as already suggested by high-frequency data—raising consumer inflation generally (Cavallo, Llamas, and Vazquez 2025). Higher prices would reduce real income and consumption further, which, in turn, could dampen private investment. These effects could be especially pronounced in export-intensive economies, as importers move parts of the supply chain onshore. Consumer and business confidence would also decline in the context of escalating trade conflicts, further reducing economic activity. In the long run, sustained high trade barriers and reduced trade would dampen productivity growth, including by impeding the diffusion of technology across borders.

Damage to global supply could, over time, push up prices even in countries that do not raise their own tariffs and are not significantly affected by rising tariffs elsewhere. A bout of higher inflation and weaker growth would pose substantial challenges to central banks in affected economies, especially if inflation expectations showed signs of de-anchoring following several years of above target price gains.

INDIAN ECONOMY

Economic activity worldwide has remained steady over the past few months, despite adverse trade policy disruptions. As a result, global economic growth this year is now expected to fare better than initially feared. This is reflected in the International Monetary Fund's (IMF) upward revision of the global growth forecast for 2025 to 3.2 per cent in October 2025, compared to 3 per cent in July 2025 and 2.8 per cent in April 2025. Several transitory factors, such as a lower effective tariff rate in the US and frontloading of trade, have contributed to propping up growth. However, this resilience masks underlying structural weaknesses which are coming to the fore, leaving projections for global growth in 2026 broadly unchanged since July 2025.

Amidst this uncertain global outlook, India's economy continues to gain momentum. Demand conditions across rural and urban India strengthened with the implementation of the GST reforms and the festive season, coinciding with industry reports signalling robust growth in sales, particularly in sectors such as automobiles. On the supply side, the manufacturing and services sectors expanded healthily. Taking into account the higher-than-anticipated growth in Q1 FY26 and steady upward trends visible in Q2 FY26, India's growth forecasts for FY26 have been upgraded. The IMF now forecasts real GDP growth of 6.6 per cent, while the Reserve Bank of India's (RBI) Monetary Policy Committee (MPC) expects real GDP to increase by 6.8 per cent, indicating upward revisions of 20 and 30 basis points, respectively.

Inflation has remained well under control, supported by deflation in food categories. Continued deflation in the food category has led to a slowdown in retail headline inflation to 1.54 per cent in September 2025, resulting in a retail headline inflation rate of 1.7 per cent in Q2 FY26. The prices of non-food and non-fuel items remained stable, with core inflation coming in at 4.6 per cent in September 2025. Barring shocks stemming from adverse weather events and supply chain disruptions, price stability is expected to prevail. The RBI forecasts inflation at 1.8 per cent in Q3 FY26 and anticipates an uptick in Q4 FY26 and Q1 FY27 as base effects fade.

Moreover, the RBI's efforts to maintain adequate liquidity within the banking system have played a crucial role in ensuring the availability of resources for strengthening economic activities. Further, the transmission mechanism in both money and credit markets continues to operate smoothly, reflecting the effectiveness of these measures. The RBI's recent regulatory and development policy reflects a calibrated response to the evolving macroeconomic conditions, combining prudence with

comprehensive structural reforms. These measures are aimed at strengthening the banking sector, improving credit flow, promoting ease of doing business, simplifying foreign exchange management, and internationalising the Indian Rupee.

In terms of external trade, India's external economic activity has remained resilient with a steady trade performance in H1 FY26, amidst the dynamic global trade landscape. The country's total exports (goods & services) have registered a growth of 4.4 per cent YoY in H1 FY26, reaching USD 413.3 billion. While merchandise exports have grown by 3 per cent (YoY), services exports grew by 6.1 per cent (YoY). During the same period, core merchandise exports continued to grow strongly by 7.5 per cent (YoY).

The government has been focused on making the Indian economy resilient to external vulnerabilities through structural reforms. The emphasis on skill development and employment generation has led to a stable labour market in H1 FY26, characterised by an increase in labour force participation, employment growth in both industry and services, and strong hiring sentiments in the economy. In addition, the introduction of GST 2.0 is expected to stimulate consumption and investment across sectors, which in turn fosters employment generation. The government is also introducing initiatives to promote research and innovation, aiming to enhance the global competitiveness of Indian industries. The Promotion of Research & Innovation in Pharma-MedTech Sector (PRIP) scheme of the Department of Pharmaceuticals is a landmark policy that supports approximately ₹11,000 crore in Pharma-MedTech research and innovation projects, aiming to transform the sector into a globally competitive, innovation-driven one. This scheme provides enhanced support for early-stage projects, flexible collaboration pathways, and a focus on public health priorities, aiming to accelerate the development of ideas into market-ready solutions.

INDUSTRY- TEXTILE INDUSTRY

India's textiles sector is one of the oldest and most diverse industries in the country, with roots stretching back centuries. It spans from traditional hand-spun and handwoven clusters to sophisticated capital-intensive mills, supported by a robust base of fibres and yarns ranging from cotton, jute, silk, and wool to polyester, viscose, and acrylic. The decentralised power loom, hosiery, and knitting segment remains the largest component, reflecting the industry's ability to cater to multiple consumer markets. Its close linkage with agriculture, reliance on natural resources like cotton, and strong cultural heritage give the Indian textiles industry a unique identity compared to other manufacturing sectors.

Over the years, India has built the capacity to serve a wide spectrum of demand, from affordable mass-market apparel to niche high-value categories, both domestically and internationally. The industry today employs more than 45 million people, underlining its role as one of the country's largest generators of livelihoods. Forecasts suggest the domestic textile and apparel market could reach US\$ 225 billion by 2025, growing at 10-12% annually, with exports expected to rise sharply in parallel.

To sustain competitiveness and attract investment, the government has been actively supporting the sector through targeted initiatives such as the Scheme for Integrated Textile Parks (SITP), the Technology Upgradation Fund Scheme (TUFS), and the Mega Integrated Textile Region and Apparel (MITRA) Park scheme. These measures, along with new investments in technology, innovation, and design, are positioning the textiles sector not only as one of India's oldest industries but also as one of its most future-ready.

Market Size

The market for Indian textiles and apparel is projected to grow at a 10% CAGR to reach US\$ 2.3 billion by 2030. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$ 100 billion.

The textiles and apparel industry now contributes approximately 2% of India's GDP and about 11% of manufacturing GVA (Gross Value Added) as of August 2025. The textile industry in India is predicted to double its contribution to the GDP to approximately 5% by the end of this decade.

Global fibre demand is expected to reach around 149 million tonnes in 2030, with increasing population and growth in per-capita consumption.

The Indian Technical Textiles market is the fifth largest in the world. The technical textiles industry was valued at US\$ 29 billion in 2024 and is projected to grow to US\$ 45 billion by 2026, US\$ 123 billion by 2035, and US\$ 309 billion by 2047.

The India mobiltech textile market (a division of technical textiles for automotive use) is projected to grow from US\$ 2.32 billion in FY25 to US\$ 4.57 billion by FY33, at a CAGR of 8.84%. This growth is driven by rising demand for advanced materials, electric vehicles, and sustainability focus.

India's sports technology market was valued at US\$ 185.3 million in 2023 and is projected to reach US\$ 830.3 million by 2030, growing at a CAGR of 23.9% from 2024 to 2030.

India's home textile industry is expected to expand at a CAGR of 8.9% during 2023-32 and reach US\$ 23.32 billion in 2032 from US\$ 10.78 billion in 2023.

Technical textiles are revolutionizing the textile industry in India by offering innovative solutions across various sectors. These specialized fabrics are designed for specific performance attributes and applications, ranging from automotive and aerospace to healthcare and construction. With a growing emphasis on technology and research, India is positioning itself as a global leader in this field, leveraging its strong textile heritage and advanced manufacturing capabilities.

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027.

The total exports during FY 26 (April-June 2025) stood at US\$ 9.40 billion, with RMG (45%), Cotton Textiles (30%) and Man-Made Textiles (12%) as key contributors.

Evolution of the Indian textile sector

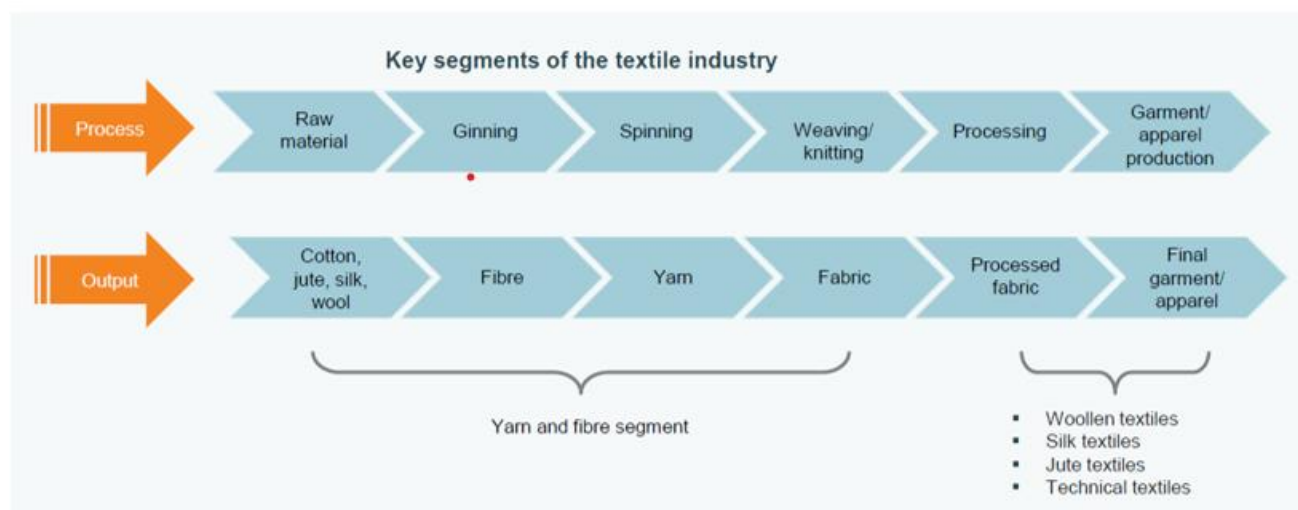

Key facts

The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The textiles and apparel industry now contributes approximately 2% of India's GDP and about 11% of manufacturing GVA (Gross Value Added) as of August 2025.

For FY 24, textiles and apparel contributed 12% of India's exports.

The sector has been posting strong growth over the years

According to IMARC, the India textile market size was valued at US\$ 146.55 billion in 2024. The market is projected to reach US\$ 213.51 billion by 2033, exhibiting a CAGR of 3.85% from 2025-2033.

The textile industry in India is predicted to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade.

In July 2025, Prime Minister Mr. Narendra Modi highlighted the strong growth of India's textile and apparel sector, driven by diverse contributors including rural women, designers, and start-ups. With over 3,000 textile start-ups, the sector is boosting India's global handloom identity. He called it key to 'Atmanirbhar Bharat' and urged support for Indian-made products to achieve the 2047 development vision.

Incentives under the scheme will be available for five years from 2025-26 to 2029-30 on incremental turnover achieved from 2024-25 to 2028-29. The scheme proposes to incentivise MMF (man-made fibre) apparel, MMF fabrics and 10 segments of technical textiles products.

The amount of Rs 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major boost for textile manufacturers. The scheme proposes to incentivise MMF (man-made fibre) apparel, MMF fabrics and 10 segments of technical textiles products.

Export have posted strong growth over the years

India's textile industry is on the brink of expansion, ranking among the top five global exporters in several categories, with total textile exports projected to reach US\$ 65 billion by FY26.

The textile sector is expected to play a significant role, with a target of US\$ 100 billion in exports by FY 30.

India's share of global trade in textiles and apparel stands at 3.9%.

In FY 26 (April-June 2025) the total exports of textiles and apparels (incl handicrafts) stood at US\$ 9.40 billion.

Ready Made Garments (RMG) category with export of US\$ 4,193 million has the largest share (45%) in the total exports US\$ 9.40 billion during FY 26 (April-June 2025), followed by Cotton Textiles (30%, US\$ 2,860 million), Man Made Textiles (12% US\$ 1,167 million).

India's ready-made garment (RMG) exports are likely to surpass US\$ 30 billion by 2027 growing at a CAGR of 12-13%.

Exporters gaining from strong global demand

According to ICRA, Indian apparel exporters are expected to see revenue grow by 9-11% in FY 26. This will be driven by higher sales volumes and prices, supported by the "China Plus One" strategy and importers needing to restock inventory.

India is the world's second largest textile exporter. Capacity built over years has led to low cost of production per unit in India's textile industry. This has lent a strong competitive advantage to the country's textile exporters over key global peers.

During FY 26 (April-June 2025) the total exports of textiles and apparels (incl. handicrafts) stood at US\$ 9.40 billion with RMG (45%), Cotton Textiles (30%), and Man-Made Textiles (12%) as key contributors.

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027.

In July 2024 India witnessed a 4.73% growth in its textile and apparel exports, amounting to US\$ 2,937.56 million. This increase was primarily fueled by a rising demand for apparel, especially from the United States, European Union, and United Kingdom. The Confederation of Indian Textile Industry (CITTI) anticipates continued expansion in the forthcoming months.

Government Initiatives

The Indian government has come up with several export promotion policies for the textile sector. It has also allowed 100% FDI in the sector under the automatic route.

Other initiatives taken by the Government of India are:

In July 2025, the Union Minister of Textiles, Mr. Giriraj Singh has approved a Rs. 1,894 crore (US\$ 216.09 million) plan for the PM MITRA Park in Virudhunagar, Tamil Nadu. Spanning 1,052 acres, the park will focus on technical textiles and integrated processing. Targeted for completion by September 2026, it is expected to attract Rs. 10,000 crore (US\$ 1.14 billion) in investments and create one lakh jobs.

In April 2025, Madhya Pradesh has secured approval for the Rs. 2,100 crore (US\$ 239.59 million) PM MITRA Park, a project poised to revolutionize the state's textile industry. This integrated park, spanning 2,100 acres, will feature advanced facilities and residential complexes, attracting significant investment and creating numerous jobs.

The government signed an MoU with the Brand & Sourcing Leaders' Association to boost Madhya Pradesh's textile sector, aligning with the PM MITRA Park in Dhar. Over Rs. 16,000 crore (US\$ 1.83 billion) in investment intent letters have been received, with Rs. 3,500 crore (US\$ 399.32 million) already invested. The state is promoting organic cotton and modern textile infrastructure under India's Five 'F' Vision.

The Khadi and Village Industries Commission (KVIC) recorded a record turnover of US\$ 20.5 billion in 2024-25, marking a strong revival of Khadi. A 20% wage hike for spinners will take effect from April 2025 to support artisans. Rising demand, job creation, and modern design innovations are driving Khadi's transformation into a sustainable fashion choice for younger generations.

The Samarth Scheme extended for FY25 and FY26 with Rs. 495 crore (US\$ 56.6 million) budget, aims to train three lakh people in textile skills. It is demand-driven, placement-focused, covers the entire textile value chain except spinning and weaving, and supports job creation and productivity enhancement. As of July 2025, over 4.57 lakh beneficiaries have been trained, with 3.55 lakh placed, including 88% women.

As of March 2025, about 1.8 lakh weavers, artisans, and handloom-related entities have been registered on the Government e-Marketplace (GeM) portal.

The Central government aims to achieve Rs. 86,680 crore (US\$ 10 billion) in technical textile exports under the National Technical Textiles Mission, launched in FY21 and extended until FY26 with a financial outlay of Rs. 1,480 crore (US\$ 170.74 million). India's technical textile exports range between Rs. 17,336 crore (US\$ 2 billion) and Rs. 26,004 crore (US\$ 3 billion).

The Prime Minister Mega Integrated Textile Region and Apparel (PM MITRA) Parks Scheme aims to establish 7 world-class mega textile parks with state-of-the-art infrastructure, plug-and-play facilities, and a fully integrated textile value chain with a total investment of US\$ 541.82 million (Rs. 4,445 crore) for the years up to 2027-28 was approved by the government. These parks are expected to attract investments worth Rs. 85,370 crore (US\$ 10 billion).

Secretary of the Ministry of Textiles, Ms. Rachna Shah, announced that India's technical textiles market has great potential, with a notable growth rate of 10% and ranking as the 5th largest in the world.

A tripartite Memorandum of Understanding (MoU) was signed by the Textiles Committee under the Ministry of Textiles, the Government e Marketplace (GeM) under the Ministry of Commerce and Industry, and the Standing Conference of Public Enterprises (SCOPE) to promote upcycled products made from textile waste and scrap.

Mr. Piyush Goyal also discussed the roadmap to achieve the target of US\$ 250 billion in textiles production and US\$ 100 billion in exports by 2030.

In July 2023, 43 new implementing partners were empanelled under the SAMARTH scheme and an additional target of training around 75,000 beneficiaries has been allocated.

In June 2023, the Government approved R&D projects worth US\$ 7.4 million (Rs. 61.09 crore) in the textile sector.

In February 2023, the union government approved 1,000 acres for setting up a textile park in Lucknow.

In February 2023, according to the Union Budget 2023-24, the total allocation for the textile sector was Rs. 4,389.24 crore (US\$ 536.4 million). Out of this, Rs. 900 crore (US\$ 109.99 million) is for Amended Technology Upgradation Fund Scheme (ATUFS), Rs. 450 crore (US\$ 54.99 million) for National Technical Textiles Mission, and Rs. 60 crore (US\$ 7.33 million) for Integrated Processing Development Scheme.

Road Ahead

The future of India's textiles industry looks promising, supported by rising domestic demand, growing exports, and policy interventions that are strengthening competitiveness. The sector, which already contributes around 2% to GDP and employs over 45 million people, is expected to see its share in the economy nearly double by the end of the decade.

Technical textiles will play a pivotal role in this growth. The segment, valued at US\$ 29 billion in FY24, is projected to expand rapidly, reaching US\$ 45 billion by 2026 and continuing on a strong trajectory thereafter. Within this, mobiltech textiles for automotive use are expected to nearly double from US\$ 2.32 billion in FY25 to US\$ 4.57 billion by FY33, driven by the rise of electric vehicles and demand for advanced materials.

Sustainability and innovation are emerging as defining themes for the industry. Companies are increasingly adopting eco-friendly processes and recyclable fibres to align with global trends, while government schemes like MITRA Parks and support for integrated textile hubs are encouraging value addition and modernisation.

With household incomes rising, urbanisation expanding, and demand from sectors like housing, healthcare, and hospitality growing steadily, India's textile and apparel market is projected to reach US\$ 350 billion by 2030. This positions India not only to strengthen its domestic market but also to expand its global footprint in textiles and apparel.

A PROCESS OF FABRIC DIVISION TEXTILE BUSINESS:

1. Design and Development

We create fabric designs that capture current market trends and customer preferences and incorporate sustainable materials, digital printing, and innovative textures. We design the fabrics that cater customer needs, provide comfort and luxury. We forecast trend, fashion and customer feedback to take informed design decisions and deliver unique, market-driven fabric designs that exceed customer expectations.

We develop fabric samples for review and approval. Ensure samples meet quality standards, including color accuracy, fabric quality and texture. We finalize fabric design, specifications, fabric composition, weight and weave.

2. Raw Material Procurement

We source yarn from suppliers based on quality, price and per requirement of the customers. We negotiate prices, lead times and payment terms with selected suppliers. We source yarns that meet specific fiber, colour and quality requirements.

3. Yarn Dyeing

Yarn dyeing is the dyeing of the yarns before they have been woven or knitted into fabrics. Yarn dyeing is used to create interesting checks, stripes and plaids with different-colored yarns in the weaving process. After procurement of raw material we send yarn for dyeing at vendors facility as per specifications of customer. After completing the job-work, they undergo a quality check to ensure the specification are as per requirement.

4. Warping

Warping is intended to prepare the beam of the weaver to be installed on the weaving machine. Warping performs the following operations:

- Create, out of a limited number of warp threads (creel load), a warp composed of any number of threads with the desired length.
- Arrangement of the above-mentioned threads according to the desired sequence.

The industrial warping process can be accomplished:

- Sectional warping (conical drum or indirect warping).
- Beam warping or direct warping (preparatory beam warping).

5. Sizing:

Sizing is the implementation of the adhesive protective layer before weaving in the warp threads. Warp yarns can resist the complex stresses they are subjected to in the weaving machine.

6. Weaving

We produce fabric using weaving or knitting processes. For that we set up weaving or knitting machines according to fabric design specifications. We monitor the weaving or knitting process to ensure fabric quality and consistency,

adjust machine settings as needed to achieve desired fabric texture and density. We produce fabric to specified dimensions, weight, and quality standards.

7. Processing and Dyeing

After weaving, we send the fabric for dyeing, printing and finishing as per requisition of customer. In dyeing process, color is applied to fabrics using various dyeing techniques and chemicals, further apply patterns or designs to fabrics using techniques like screen printing or digital printing and at later stage treat fabrics with chemicals or processes to enhance their properties, such as softness, wrinkle resistance, or water repellency.

8. Quality Assurance, Packaging and Labeling

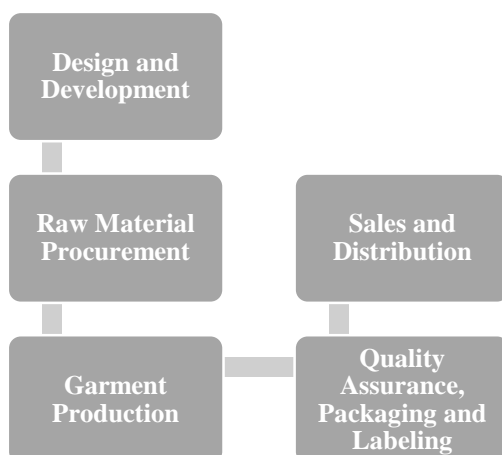

We conduct final quality assurance checks. We conduct inspections of finished fabric to ensure quality and consistency. We check for defects, such as weaving errors, yarn breaks or color inconsistencies. We verify fabric meets specifications, including weight, width, and thread count. We test fabric for performance characteristics such as durability, wrinkle resistance.

We package fabric in rolls, folds or bags according to customer specifications. We use protective materials, such as paper, plastic, or cardboard, to prevent damage. We label packages with customer information, fabric details and handling instructions. We ensure labels comply with regulatory requirements. Then we attach labels to fabric and verify label accuracy.

9. Sales and Distribution

We receive orders from customers, then we verify order accuracy, including fabric type, quantity, color, and delivery details. Also we confirm customer information such as shipping address and payment details. After completed whole process, we ship fabric to customers as per their instructions. We prepare shipments by packaging fabric, generating shipping labels and documenting order details.

We also procure zippers, buttons, threads and other small components which are used in garments production. Further we use interlinings to add insulation, cushioning, or padding to specific areas of a garment. Common applications for interlinings include collars, waistbands, buttonholes and pockets.

3. Garment Production

We outsource our garment production process to one of our promoter group entities, JK Fabtex Industries Private Limited and other vendor. National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource.

ANNEXURE IV SIGNIFICANT ACCOUNTING POLICIES

(A) Basis of Accounting

The financial statements are prepared under historical cost convention on an accrual basis and are in accordance with the generally accepted accounting principles in India, the applicable mandatory accounting standards as notified by Companies (Accounting Standards) Rules, 2014 and the relevant provisions of The Companies Act, 2013.

(B) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures relating to contingent liabilities as at the date of financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Difference between the actual result and estimates are recognized in periods in which the results are known / materialized

(C) Fixed Assets

1. The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.
2. Items of property, plant and equipment (including capital-work-in progress) are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and any accumulated impairment losses. Freehold land is carried at historical cost less any accumulated impairment losses.
3. Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.
4. The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other costs directly attributable to bringing the item to working condition for its intended use, and estimated costs of dismantling and removing the item and restoring the site on which it is located.
5. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment. Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

(D) Depreciation

Depreciation is systematic allocation of the depreciable amount of an asset over its useful life and is provided on a straight-line basis over the useful life prescribed in Schedule II to the Companies Act, 2013, unless otherwise specified.

(E) Impairment of Assets

The carrying amounts of fixed assets are reviewed at each Balance Sheet date to ascertain if there is any indication of impairment based on internal/external factors. An impairment loss is recognized where the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value.

(F) Valuation of Inventories

Inventories are valued at Cost or Realizable value, whichever is lower

(G) Revenue Recognition

I) Sale of goods is recognised when the risk and rewards of ownership are passed on to the customers, which is generally on dispatch of goods. Sales are stated net of returns and excluding goods and service tax.

K K SILK MILLS LIMITED

(All amounts are in INR Lakhs, unless otherwise stated)

II) Purchases are accounted at total purchase prices as per the bills. The difference on account of delayed payment, if any, is accounted for at the time of settlement / payment of the respective bill.

(H) Foreign Exchange Transactions

I) Transactions in foreign currencies are recorded at exchange rates existing at the time of the transactions and exchange difference arising from foreign currency transactions are dealt with in the Profit and Loss Statement.

II) All Assets and Liabilities relating to transactions involving foreign currencies are converted at exchange rates prevailing at the year-end. Any loss or gain arising out of settlements/conversion is adjusted in the Profit and Loss Statement.

(I) Retirement Benefits

Retirement benefits to the staff such as gratuity are accounted when the amounts become payable.

(J) Borrowing Cost

Borrowing costs attributable to the acquisition or construction of qualifying asset are capitalized as part of the cost of asset. Other borrowing costs are recognized as an expense in the period for which they are incurred.

(K) Material Events

Material events occurring after the Balance Sheet date are taken into cognizance.

(L) Provision, Contingent Liabilities and Contingent Assets:

Provisions involving substantial degree of estimation in measurement are recognized when there is present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent Liabilities are not recognized but are disclosed in the notes. Contingent Assets are neither recognized nor disclosed in the financial statements.

(M) Taxation

Provision for current tax is made on the basis of estimated taxable income for the current accounting year in accordance with the Income Tax Act, 1961.

Deferred tax is recognized, subject to prudence, on timing difference, being the tax on difference between the taxable income and the accounting income that originate in one period and is capable of reversal in one or more subsequent periods. Deferred tax assets are recognized for unabsorbed depreciation and carry forward losses to the extent there is virtual certainty that sufficient future taxable income will be available against which deferred tax assets can be realized

(N) Earnings per share

Earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders, by the weighted average number of Equity shares outstanding during the period.

SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 read with its circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, has introduced an alternate payment mechanism using Unified Payments Interface (“UPI”) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIBs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days. (“UPI Phase I”). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Individual Investors (“UPI Phase III”), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular is effective for initial public offers opening on/or after May 1, 2021, except as amended pursuant to SEBI circular SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹ 500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. The revised timeline of T+3 days shall be made applicable in two phases i.e. voluntary for all public issues opening on or after September 1, 2023 and mandatory on or after December 1, 2023. Further, SEBI has vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 reduced the time taken for listing of specified securities after the closure of a public issue to three Working Days. Accordingly, the Offer

will be made under UPI Phase III on a mandatory basis, subject to any circulars, clarification or notification issued by the SEBI from time to time.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by Individual Investors through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Individual Investor, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Investors using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

The list of Banks that have been notified by SEBI as Issuer Banks for UPI are provided on <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=40>.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (**FDI**) through press notes and press releases.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (Consolidated FDI Policy), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act and referred to in this Prospectus as “U.S. QIBs”) in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the

jurisdiction where those offers and sales occur. For the avoidance of doubt, the term “U.S. QIBs” does not refer to a category of institutional investors defined under applicable Indian regulations and referred to in this Prospectus as “QIBs”.
